Partially Linear Models

With 17 Figures
and 11 Tables

Physica-Verlag

A Springer-Verlag Company

CONTENTS

PREFACE	v
1 INTRODUCTION	1
1.1 Background, History and Practical Examples	1
1.2 The Least Squares Estimators	12
1.3 Assumptions and Remarks	14
1.4 The Scope of the Monograph	16
1.5 The Structure of the Monograph	17
2 ESTIMATION OF THE PARAMETRIC COMPONENT . . .	19
2.1 Estimation with Heteroscedastic Errors	19
2.1.1 Introduction	19
2.1.2 Estimation of the Non-constant Variance Functions	22
2.1.3 Selection of Smoothing Parameters	26
2.1.4 Simulation Comparisons	27
2.1.5 Technical Details	28
2.2 Estimation with Censored Data	32
2.2.1 Introduction	32
2.2.2 Synthetic Data and Statement of the Main Results	33
2.2.3 Estimation of the Asymptotic Variance	36
2.2.4 A Numerical Example	37
2.2.5 Technical Details	38
2.3 Bootstrap Approximations	40
2.3.1 Introduction	40
2.3.2 Bootstrap Approximations	41
2.3.3 Numerical Results	43
3 ESTIMATION OF THE NONPARAMETRIC COMPONENT	45
3.1 Introduction	45

3.2	Consistency Results	46
3.3	Asymptotic Normality	49
3.4	Simulated and Real Examples	50
3.5	Appendix	52
4	ESTIMATION WITH MEASUREMENT ERRORS	55
4.1	Linear Variables with Measurement Errors	55
4.1.1	Introduction and Motivation	55
4.1.2	Asymptotic Normality for the Parameters	56
4.1.3	Asymptotic Results for the Nonparametric Part	58
4.1.4	Estimation of Error Variance	58
4.1.5	Numerical Example	59
4.1.6	Discussions	61
4.1.7	Technical Details	61
4.2	Nonlinear Variables with Measurement Errors	65
4.2.1	Introduction	65
4.2.2	Construction of Estimators	66
4.2.3	Asymptotic Normality	67
4.2.4	Simulation Investigations	68
4.2.5	Technical Details	70
5	SOME RELATED THEORETIC TOPICS	77
5.1	<i>The Laws of the Iterated Logarithm</i>	<i>77</i>
5.1.1	Introduction	77
5.1.2	Preliminary Processes	78
5.1.3	Appendix	79
5.2	The Berry-Esseen Bounds	82
5.2.1	Introduction and Results	82
5.2.2	Basic Facts	83
5.2.3	Technical Details	87
5.3	Asymptotically Efficient Estimation	94
5.3.1	Motivation	94
5.3.2	Construction of Asymptotically Efficient Estimators	94
5.3.3	Four Lemmas	97

5.3.4	Appendix	99
5.4	Bahadur Asymptotic Efficiency	104
5.4.1	Definition	104
5.4.2	Tail Probability	105
5.4.3	Technical Details	106
5.5	Second Order Asymptotic Efficiency	111
5.5.1	Asymptotic Efficiency	111
5.5.2	Asymptotic Distribution Bounds	113
5.5.3	Construction of 2nd Order Asymptotic Efficient Estimator	117
5.6	Estimation of the Error Distribution	119
5.6.1	Introduction	119
5.6.2	Consistency Results	120
5.6.3	Convergence Rates	124
5.6.4	Asymptotic Normality and LIL	125
6	PARTIALLY LINEAR TIME SERIES MODELS	127
6.1	Introduction	127
6.2	Adaptive Parametric and Nonparametric Tests	127
6.2.1	Asymptotic Distributions of Test Statistics	127
6.2.2	Power Investigations of the Test Statistics	131
6.3	Optimum Linear Subset Selection	135
6.3.1	A Consistent CV Criterion	136
6.3.2	Simulated and Real Examples	139
6.4	Optimum Bandwidth Selection	144
6.4.1	Asymptotic Theory	144
6.4.2	Computational Aspects	149
6.5	Other Related Developments	156
6.6	The Assumptions and the Proofs of Theorems	157
6.6.1	Mathematical Assumptions	157
6.6.2	Technical Details	160
	APPENDIX: BASIC LEMMAS	181
	AUTHOR INDEX	197
