Facades

.

Principles of

UNIVERSITÄT
LIECHTENSTEIN
Bibliothek

CONTENTS

7 1 Introduction	36 3 Principles of Construction
14 2 From Wall to Facade	37 Areas of construction
14 Solid wall construction	38 Facade bearing structures and load transfer
14 Warm facade, cold facade	42 Grid and positioning of the facade within the building
16 Openings in solid wall construction	44 Systems used in facade construction
18 Bridging the gap	45 Post-and-beam construction
19 Single glazing	46 Unit system facade
20 Box window	46 Designing with systems
21 Insulated glazing	47 Openings in facade constructions
22 Walls with skeletal structure	47 Hardware
22 Half-timbered construction	48 Windows
23 Platform and balloon framing	50 Assembly
24 Resolution of the wall into loadbearing structure and facade	52 4 Detailing and Tolerances
25 Post-and-beam facade	54 Building grid and positioning of
26 Post facade	56 Combination of functions
26 Beam facade	57 Detailing principles
27 Curtain wall	57 Layering of details
28 System facade	58 Examples of detail development
29 Double facades	59 Masonry cladding
30 Second-skin facade	59 Post-and-beam facade
30 Box-window facade	60 Unit system facade
31 Corridor facade	61 Parapet
32 Shaft-box facade	62 Plinth unit
33 Alternating facade	63 Joints
34 Integrated facade	67 Tolerances

70 | 5 Climate and Energy

70 | **Facade as interface to the exterior**

71 | **User comfort**

71 | Thermal requirements

72 | Visual requirements

73 | Hygienic requirements

73 | Acoustic requirements

74 | **Regulating the comfort level with the facade**

74 | Ventilation

77 | Heating

78 | Cooling

80 | **Sun and glare protection**

84 | **Light-directing systems**

85 | 6 Adaptive Facades

85 | Sun

86 | **Light**

86 | **Heat**

87 | **Greenhouse effect**

87 | **History of adaptive facades**

90 | **Collector facade**

90 | Trombe wall

91 | Transparent heat insulation

92 | Exhaust-air facade

93 | **Double facade**

94 | Box-window facade

95 | Shaft-box facade

96 | Corridor facade

98 | Second-skin facade

100 | **Alternating facade**

100 | **Integrated facade**

102 | 7 Case Studies

Unit system facade:

102 | Debitel Headquarters, Stuttgart

Solid concrete facade:

106 | Zollverein School of Management and Design, Essen

Free-form metal facade:

110 | Guggenheim Museum, Bilbao

Timber-frame structure with multiple cladding:

114 | Hageneiland Housing, Ypenburg

120 | 8 A Look Into the Future

120 | **The forces driving new developments**

121 | **Materials and technology**

121 | Technology transfer

121 | Nano coatings

121 | Adhesive materials technology

122 | Smart materials

124 | **Production and assembly**

124 | Free-form facades

125 | Modular construction

125 | Composite building materials

126 | Generative manufacturing methods

127 | Computer technology

128 | **Evaluation strategies**

128 | Facade functionality

129 | Design tools

130 | **The integrated envelope**
