

Robert A. Meyers (Ed.)

# **Encyclopedia of Complexity and Systems Science**

With 4300 Figures and 420 Tables

Volume 1

A-CI

4u Springer

# Topical Table of Contents

## **Agent Based Modeling and Simulation, Section Editor: Filippo Castiglione**

Agent Based Computational Economics  
Agent Based Modeling and Artificial Life  
Agent Based Modeling and Computer Languages  
Agent Based Modeling and Simulation, Introduction to  
Agent Based Modeling, Large Scale Simulations  
Agent Based Modeling, Mathematical Formalism for  
Agent-Based Modeling and Simulation  
Cellular Automaton Modeling of Tumor Invasion  
Computer Graphics and Games, Agent Based Modeling in  
Embodied and Situated Agents, Adaptive Behavior in  
Interaction Based Computing in Physics  
Logic and Geometry of Agents in Agent-Based Modeling  
Social Phenomena Simulation  
Swarm Intelligence

## **Autonomous Robotics, Complexity and Nonlinearity in. Section Editor: Warren Dixon**

Adaptive Visual Servo Control  
Cognitive Robotics  
Complexity and Non-Linearity in Autonomous Robotics, Introduction to  
Continuum Robots  
Distributed Controls of Multiple Robotic Systems, An Optimization Approach  
Distributed Robotic Teams: A Framework for Simulated and Real-World Modeling  
Foraging Robots  
Human Robot Interaction  
Image Based State Estimation  
Modular Self-Reconfigurable Robots  
Motion Prediction for Continued Autonomy  
Multiple Mobile Robot Teams, Path Planning and Motion Coordination in  
Neuro-fuzzy Control of Autonomous Robotics  
Self-replicating Robotic Systems  
Software Architectures for Autonomy

## **Cellular Automata, Mathematical Basis of, Section Editor: Andrew Adamatzky**

Additive Cellular Automata  
Algorithmic Complexity and Cellular Automata  
Cellular Automata and Groups  
Cellular Automata and Language Theory  
Cellular Automata as Models of Parallel Computation  
Cellular Automata in Hyperbolic Spaces

Cellular Automata Modeling of Physical Systems  
Cellular Automata on Triangular, Pentagonal and Hexagonal Tessellations  
Cellular Automata with Memory  
Cellular Automata, Classification of  
Cellular Automata, Emergent Phenomena in  
Cellular Automata, Universality of  
Chaotic Behavior of Cellular Automata  
Dynamics of Cellular Automata in Non-compact Spaces  
Ergodic Theory of Cellular Automata  
Evolving Cellular Automata  
Firing Squad Synchronization Problem in Cellular Automata  
Gliders in Cellular Automata  
Growth Phenomena in Cellular Automata  
Identification of Cellular Automata  
Mathematical Basis of Cellular Automata, Introduction to  
Phase Transitions in Cellular Automata  
Quantum Cellular Automata  
Reversible Cellular Automata  
Self-organised Criticality and Cellular Automata  
Self-Replication and Cellular Automata  
Structurally Dynamic Cellular Automata  
Tiling Problem and Undecidability in Cellular Automata  
Topological Dynamics of Cellular Automata

### **Chaos and Complexity in Astrophysics, Section Editor: Steve N. Shore**

Acceleration Mechanisms  
Astronomical Time Series, Complexity in  
Astrophysics, Chaos and Complexity in  
Astrophysics: Dynamical Systems  
Chaos and Complexity in Astrophysics, Introduction to  
Cosmic Gravitational Background, Stochastic  
Cosmic Strings  
Exobiology (theoretical), Complexity in  
Exobiology and Complexity  
Orbital Dynamics, Chaos in  
Self-Organization in Magnetohydrodynamic Turbulence  
Space Plasmas, Dynamical Complexity in  
Stellar Dynamics, N-body Methods for  
Topological Magnetohydrodynamics and Astrophysics

### **Climate Modeling, Global Warming and Weather Prediction, Section Editor: Hartmut Grassl**

Abrupt Climate Change Modeling  
Climate Change and Agriculture  
Climate Change and Human Health  
Climate Change, Economic Costs of  
Climate Modeling, Global Warming and Weather Prediction, Introduction to  
Cryosphere Models  
Regional Climate Models: Linking Global Climate Change to Local Impacts  
Single Column Modeling of Atmospheric Boundary Layers  
and the Complex Interactions with the Land Surface

## Complex Networks and Graph Theory, Section Editor: Geoffrey Canright

Community Structure in Graphs

Complex Gene Regulatory Networks - From Structure to Biological Observables: Cell Fate Determination

Complex Networks and Graph Theory

Complex Networks, Visualization of

Food Webs

Growth Models for Networks

Human Sexual Networks

Internet Topology

Link Analysis and Web Search

Motifs in Graphs

Non-negative Matrices and Digraphs

Random Graphs, A Whirlwind Tour of

Synchronization Phenomena on Networks

World Wide Web, Graph Structure

## Complexity in Computational Chemistry, Section Editor: Danail Bonchev

Biochemistry, Chaotic Dynamics, Noise, and Fractal Space in

Biological Complexity and Biochemical Information

Biological Development and Evolution, Complexity and Self-Organization in

Cellular Automata Modeling of Complex Biochemical Systems

Composites, Multifunctional

Computational Chemistry, Introduction to Complexity in

Computer-Aided Design of the Reaction Site in Heterogeneous Catalysis

DNA-templated Self-assembly of Protein Arrays and Highly Conductive Nanowires

Drug Design with Artificial Intelligence Methods

Drug Design with Artificial Neural Networks

Drug Design with Machine Learning

Drug Design, Molecular Descriptors in

Information Theoretic Complexity Measures

Molecular Evolution, Networks in

Nanoscale Atomic Clusters, Complexity of

Polymers, Nonlinearity in

QSAR Modeling and QSAR Based Virtual Screening, Complexity and Challenges of Modern

Quantum Similarity and Quantum Quantitative Structure-Properties Relationships (QQSPR)

Self-assembled Materials

Topological Complexity of Molecules

## Complexity in Earthquakes, Tsunamis, and Volcanoes, and Forecast, Section Editor: William H. K. Lee

Brittle Tectonics: A Non-linear Dynamical System.

Complexity in Earthquakes, Tsunamis, and Volcanoes, and Forecast, Introduction to

Crustal Deformation During the Seismic Cycle, Interpreting Geodetic Observations of

Earthquake Clusters over Multi-dimensional Space, Visualization of

Earthquake Damage: Detection and Early Warning in Man-Made Structures

Earthquake Early Warning System in Southern Italy

Earthquake Engineering, Non-linear Problems in

Earthquake Forecasting and Verification

Earthquake Location, Direct, Global-Search Methods

Earthquake Magnitude

Earthquake Monitoring and Early Warning Systems

Earthquake Networks, Complex  
Earthquake Nucleation Process  
Earthquake Occurrence and Mechanisms, Stochastic Models for  
Earthquake Scaling Laws  
Earthquake Source Parameters, Rapid Estimates for Tsunami Warning  
Earthquake Source: Asymmetry and Rotation Effects  
Earthquakes, Dynamic Triggering of  
Earthquakes, Electromagnetic Signals of  
Earth's Crust and Upper Mantle, Dynamics of Solid-Liquid Systems in  
Geo-Complexity and Earthquake Prediction  
GPS: Applications in Crustal Deformation Monitoring  
Ground Motion: Complexity and Scaling in the Near Field of Earthquake Ruptures  
Infrasound from Earthquakes, Tsunamis and Volcanoes  
Pressure Impulses Generated by Bubbles Interacting with Ambient Perturbation  
Seismic Wave Propagation in Media with Complex Geometries, Simulation of  
Seismic Waves in Heterogeneous Earth, Scattering of  
Seismicity, Critical States of: From Models to Practical Seismic Hazard Estimates  
Seismicity, Statistical Physics Approaches to  
Slug Flow: Modeling in a Conduit and Associated Elastic Radiation  
Submarine Landslides and Slow Earthquakes: Monitoring Motion with GPS and Seafloor Geodesy  
Tomography, Seismic  
Tsunami Earthquakes  
Tsunami Forecasting and Warning  
Tsunami Inundation, Modeling of  
Tsunamis, Inverse Problem of  
Volcanic Eruptions, Explosive: Experimental Insights  
Volcanic Eruptions: Cyclicity During Lava Dome Growth  
Volcanic Eruptions: Stochastic Models of Occurrence Patterns  
Volcanic Hazards and Early Warning  
Volcano Seismic Signals, Source Quantification of  
Volcanoes, Non-linear Processes in  
Wedge Mechanics: Relation With Subduction Zone Earthquakes and Tsunamis

### **Computational and Theoretical Nanoscience, Section Editor: Yong Suk Joe**

Carbon Nanotubes, Thermo-mechanical and Transport Properties of  
Charge Based Solid-State Flying Qubits  
Computational and Theoretical Nanoscience, Introduction to  
Field Computation in Natural and Artificial Intelligence  
Geometric Phase and Related Phenomena in Quantum Nanosystems  
Multimillion Atom Simulations with Nemo3D  
Nanoscale Processes, Modeling Coupled and Transport Phenomena in Nanotechnology  
Quantum Dot Spin Transistors, Self-consistent Simulation of  
Quantum Dots: Fano Resonances in Aharonov-Bohm Ring  
Quantum Impurity Physics in Coupled Quantum Dots  
Quantum Phenomena in Semiconductor Nanostructures  
Quantum Simulations of Ballistic Nanowire Field Effect Transistors  
Resonances in Electronic Transport Through Quantum Wires and Rings  
Semiclassical Spin Transport in Spin-Orbit Coupled Systems  
Spin Dependent Exchange and Correlation in Two-Dimensional Electron Layers  
Spin Dynamics in Disordered Solids  
Spin-polarized Quantum Transport in Mesoscopic Conductors: Computational Concepts and Physical Phenomena

Tight-Binding Molecular Dynamics for Carbon and Applications to Nanostructure Formation  
Tunneling Through Quantum Dots with Discrete Symmetries  
Viral Protein Nano-Actuators, Computational Studies of Bio-nanomachines

### **Data Mining and Knowledge Discovery, Section Editor: Peter Kokol**

Data and Dimensionality Reduction in Data Analysis and System Modeling  
Data-Mining and Knowledge Discovery, Introduction to  
Data-Mining and Knowledge Discovery, Neural Networks in  
Data-Mining and Knowledge Discovery: Case Based Reasoning, Nearest Neighbor and Rough Sets  
Decision Trees  
Discovery Systems  
Genetic and Evolutionary Algorithms and Programming: General Introduction and Application to Game Playing  
Knowledge Discovery: Clustering  
Machine Learning, Ensemble Methods in  
Manipulating Data and Dimension Reduction Methods: Feature Selection

### **Ecological Complexity, Section Editor: Bai-Lian Li**

Ecological Complexity  
Ecological Topology and Networks <  
Entropy Maximization and Species Abundance  
Human-Environment Interactions, Complex Systems Approaches for Dynamic Sustainable Development

### **EC Selections, Section Editor: Robert A. Meyers**

Catastrophe Theory  
Coordination Dynamics  
Infinite Dimensional Controllability  
Philosophy of Science, Mathematical Models in  
Self-organizing Systems

### **Ergodic Theory, Section Editor: Bryna Kra**

Chaos and Ergodic Theory  
Entropy in Ergodic Theory  
Ergodic Theorems  
Ergodic Theory on Homogeneous Spaces and Metric Number Theory , '  
Ergodic Theory, Introduction to  
Ergodic Theory: Basic Examples and Constructions  
Ergodic Theory: Fractal Geometry  
Ergodic Theory: Interactions with Combinatorics and Number Theory  
Ergodic Theory: Non-singular Transformations  
Ergodic Theory: Recurrence  
Ergodic Theory: Rigidity  
Ergodicity and Mixing Properties  
Isomorphism Theory in Ergodic Theory  
Joinings in Ergodic Theory  
Measure Preserving Systems  
Pressure and Equilibrium States in Ergodic Theory  
Smooth Ergodic Theory  
Spectral Theory of Dynamical Systems  
Symbolic Dynamics  
Topological Dynamics

## **Finance and Econometrics, Section Editor: Bruce Mizrach**

Bayesian Methods in Non-linear Time Series  
Corporate and Municipal Bond Market Microstructure in the U.S.  
Econometrics: Models of Regime Changes  
Econometrics: Nonlinear Cointegration  
Econometrics: Panel Data Methods  
Econophysics, Observational  
Finance and Econometrics, Introduction to  
Finance, Agent Based Modeling in  
Financial Economics, Fat-Tailed Distributions  
Financial Economics, Non-linear Time Series in  
Financial Economics, Return Predictability and Market Efficiency  
Financial Economics, The Cross-Section of Stock Returns and the Fama-French Three Factor Model  
Financial Economics, Time Variation in the Market Return  
Financial Forecasting, Non-linear Time Series in  
Financial Forecasting, Sensitive Dependence  
GARCH Modeling  
Macroeconomics, Nonlinear Time Series in  
Market Microstructure  
Market Microstructure, Foreign Exchange  
Microeconometrics  
Nonparametric Tests for Independence  
Stochastic Volatility  
Treasury Market, Microstructure of the U.S.

## **Fractals and Multifractals, Section Editor: Daniel ben-Avraham and Shlomo Havlin**

Anomalous Diffusion on Fractal Networks  
Dynamics on Fractals  
Fractal and Multifractal Scaling of Electrical Conduction in Random Resistor Networks  
Fractal and Multifractal Time Series  
Fractal and Transfractal Scale-Free Networks  
Fractal Geometry, A Brief Introduction to  
Fractal Growth Processes  
Fractal Structures in Condensed Matter Physics  
Fractals and Economics  
Fractals and Multifractals, Introduction to  
Fractals and Percolation  
Fractals and Wavelets: What can we Learn on Transcription and Replication  
from Wavelet-Based Multifractal Analysis of DNA Sequences?  
Fractals in Biology  
Fractals in Geology and Geophysics  
Fractals in the Quantum Theory of Spacetime  
Fractals Meet Chaos  
Phase Transitions on Fractals and Networks  
Reaction Kinetics in Fractals

## **Game Theory, Section Editor: Marilda Sotomayor**

Bayesian Games: Games with Incomplete Information  
Cooperative Games  
Cooperative Games (Von Neumann-Morgenstern Stable Sets)

Correlated Equilibria and Communication in Games  
Cost Sharing  
Differential Games  
Dynamic Games with an Application to Climate Change Models  
Evolutionary Game Theory  
Fair Division  
Game Theory and Strategic Complexity  
Game Theory, Introduction to  
Implementation Theory  
Inspection Games  
Learning in Games  
Market Games and Clubs  
Mechanism Design  
Networks and Stability  
Principal-Agent Models  
Repeated Games with Complete Information  
Repeated Games with Incomplete Information  
Reputation Effects  
Signaling Games  
Static Games  
Stochastic Games  
Two-Sided Matching Models  
Voting  
Voting Procedures, Complexity of  
Zero-sum Two Person Games

### **Granular Computing, Section Editor: Tsau Y. Lin**

Cooperative Multi-Hierarchical Query Answering Systems  
Dependency and Granularity in Data Mining  
Fuzzy Logic  
Fuzzy Probability Theory  
Fuzzy System Models Evolution from Fuzzy Rulebases to Fuzzy Functions  
Genetic-Fuzzy Data Mining Techniques  
Granular Model for Data Mining  
Granular Computing and Data Mining for Ordered Data: The Dominance-Based Rough Set Approach  
Granular Computing and Modeling of the Uncertainty in Quantum Mechanics  
Granular Computing System Vulnerabilities: Exploring the Dark Side of Social Networking Communities  
Granular Computing, Information Models for  
Granular Computing, Introduction to  
Granular Computing, Philosophical Foundation for  
Granular Computing, Principles and Perspectives of  
Granular Computing: Practices, Theories and Future Directions  
Granular Neural Network  
Granulation of Knowledge: Similarity Based Approach in Information and Decision Systems  
Multi-Granular Computing and Quotient Structure  
Non-standard Analysis, An Invitation to  
Rough and Rough-Fuzzy Sets in Design of Information Systems  
Rough Set Data Analysis  
Rule Induction, Missing Attribute Values and Discretization  
Social Networks and Granular Computing

## **Intelligent Systems, Section Editor: James A. Hendler**

Artificial Intelligence in Modeling and Simulation  
Intelligent Control  
Intelligent Systems, Introduction to  
Learning and Planning (Intelligent Systems)  
Mobile Agents  
Semantic Web

## **Non-Linear Ordinary Differential Equations and Dynamical Systems, Section Editor: Ferdinand Verhulst**

Center Manifolds  
Dynamics of Hamiltonian Systems  
Dynamics of Parametric Excitation  
Existence and Uniqueness of Solutions of Initial Value Problems  
Hyperbolic Dynamical Systems  
Lyapunov-Schmidt Method for Dynamical Systems  
Non-linear Ordinary Differential Equations and Dynamical Systems, Introduction to  
Numerical Bifurcation Analysis  
Periodic Orbits of Hamiltonian Systems  
Periodic Solutions of Non-autonomous Ordinary Differential Equations  
Relaxation Oscillations  
Stability Theory of Ordinary Differential Equations

## **Non-Linear Partial Differential Equations, Section Editor: Italo Capuzzo Dolcetta**

Biological Fluid Dynamics, Non-linear Partial Differential Equations  
Control of Nonlinear Partial Differential Equations  
Dispersion Phenomena in Partial Differential Equations  
Hamilton-Jacobi Equations and weak KAM Theory  
Hyperbolic Conservation Laws  
Navier-Stokes Equations: A Mathematical Analysis  
Non-linear Partial Differential Equations, Introduction to  
Non-linear Partial Differential Equations, Viscosity Solution Method in  
Non-linear Stochastic Partial Differential Equations  
Scaling Limits of Large Systems of Nonlinear Partial Differential Equations  
Vehicular Traffic: A Review of Continuum Mathematical Models

## **Percolation, Section Editor: Muhammad Sahimi**

Bootstrap Percolation  
Conduction and Diffusion in Percolating Systems  
Continuum Percolation  
Correlated Percolation  
Elastic Percolation Networks  
Invasion Percolation  
Networks, Flexibility and Mobility in  
Percolation and Polymer Morphology and Rheology  
Percolation in Complex Networks  
Percolation in Porous Media  
Percolation Lattices, Efficient Simulation of Large  
Percolation Phase Transition  
Percolation Thresholds, Exact  
Percolation, and Faults and Fractures in Rock

Percolation, Introduction to  
Scaling Properties, Fractals, and the Renormalization Group Approach to Percolation

### **Perturbation Theory, Section Editor: Giuseppe Gaeta**

Diagrammatic Methods in Classical Perturbation Theory  
Hamiltonian Perturbation Theory (and Transition to Chaos)  
Kolmogorov-Arnold-Moser (KAM) Theory  
N-body Problem and Choreographies  
Nekhoroshev Theory  
Non-linear Dynamics, Symmetry and Perturbation Theory in  
Normal Forms in Perturbation Theory  
Perturbation Analysis of Parametric Resonance  
Perturbation of Equilibria in the Mathematical Theory of Evolution  
Perturbation of Systems with Nilpotent Real Part  
Perturbation Theory  
Perturbation Theory and Molecular Dynamics  
Perturbation Theory for Non-smooth Systems  
Perturbation Theory for PDEs  
Perturbation Theory in Celestial Mechanics  
Perturbation Theory in Quantum Mechanics  
Perturbation Theory, introduction to  
Perturbation Theory, Semiclassical  
Perturbative Expansions, Convergence of  
Quantum Bifurcations

### **Probability and Statistics in Complex Systems, Section Editor: Henrik Jeldtoft Jensen**

Bayesian Statistics  
Branching Processes  
Complexity in Systems Level Biology and Genetics: Statistical Perspectives  
Correlations in Complex Systems  
Entropy  
Extreme Value Statistics  
Field Theoretic Methods  
Fluctuations, Importance of: Complexity in the View of Stochastic Processes ,  
Hierarchical Dynamics  
Levy Statistics and Anomalous Transport: Levy Flights and Subdiffusion  
Probability and Statistics in Complex Systems, Introduction to  
Probability Densities in Complex Systems, Measuring  
Probability Distributions in Complex Systems  
Random Matrix Theory  
Random Walks in Random Environment  
Record Statistics and Dynamics  
Stochastic Loewner Evolution: Linking Universality, Criticality and Conformal Invariance in Complex Systems  
Stochastic Processes

### **Quantum Information Science, Section Editor: Joseph F. Traub**

Quantum Algorithms  
Quantum Algorithms and Complexity for Continuous Problems  
Quantum Computational Complexity  
Quantum Computing Using Optics

Quantum Computing with Trapped Ions  
Quantum Cryptography  
Quantum Error Correction and Fault Tolerant Quantum Computing  
Quantum Information Processing  
Quantum Information Science, Introduction to

**Social Network Analysis, Section Editor: John Scott**

Network Analysis, Longitudinal Methods of  
Positional Analysis and Blockmodelling  
Social Network Analysis, Estimation and Sampling in  
Social Network Analysis, Graph Theoretical Approaches to  
Social Network Analysis, Large-Scale  
Social Network Analysis, Overview of  
Social Network Analysis, Two-Mode Concepts in  
Social Network Visualization, Methods of  
Social Networks, Algebraic Models for  
Social Networks, Diffusion Processes in  
Social Networks, Exponential Random Graph ( $p^*$ ) Models for

**Social Science, Physics and Mathematics Applications in, Section Editor: Andrzej Nowak**

Agent Based Modeling and Neoclassical Economics: A Critical Perspective  
Agent Based Models in Economics and Complexity  
Applications of Physics and Mathematics to Social Science, Introduction to  
Cities as Complex Systems: Scaling, Interaction, Networks, Dynamics and Urban Morphologies  
Consciousness and Complexity  
Development, Complex Dynamic Systems of  
Development, Evolution, and the Emergence of Novel Behavior  
Dynamics and Evaluation: The Warm Glow of Processing Fluency  
Dynamics of Language  
Evolution of Culture, Memetics  
Extreme Events in Socio-economic and Political Complex Systems, Predictability of  
Human Behavior, Dynamics of  
Intermittency and Localization  
Investment Decision Making in Finance, Models of  
Marketing: Complexity Modeling, Theory and Applications in  
Minority Games  
Moral Dynamics  
Opinions Dynamics and Sociophysics  
Physics and Mathematics Applications in Social Science  
Rational, Goal-Oriented Agents  
Social Cognitive Complexity  
Social Coordination, from the Perspective of Coordination Dynamics  
Social Organizations with Complexity Theory: A Dramatically Different Lens for the Knowledge Economy  
Social Processes, Physical Models of  
Social Processes, Simulation Models of  
Social Psychology, Applications of Complexity to  
Traffic and Crowd Dynamics: The Physics of the City

**Soft Computing, Section Editor: Janusz Kacprzyk**

Aggregation Operators and Soft Computing  
Evolving Fuzzy Systems

Fuzzy Logic, Type-2 and Uncertainty  
fuzzy Optimization  
Fuzzy Sets Theory, Foundations of  
Hybrid Soft Computing Models for Systems Modeling and Control  
Neuro-fuzzy Systems  
Possibility Theory  
Rough Sets in Decision Making  
Rough Sets: Foundations and Perspectives  
Soft Computing, Introduction to  
Statistics with Imprecise Data

### **Solitons, Section Editor: Mohamed A. Helal**

Adomian Decomposition Method Applied to Non-linear Evolution Equations in Soliton Theory  
Inverse Scattering Transform and the Theory of Solitons  
Korteweg-de Vries Equation (KdV), Different Analytical Methods for Solving the  
Korteweg-de Vries Equation (KdV) and Modified Korteweg-de Vries Equations (mKdV),  
Semi-analytical Methods for Solving the  
Korteweg-de Vries Equation (KdV), Some Numerical Methods for Solving the  
Korteweg-de Vries Equation (KdV) History, Exact N-Soliton Solutions and Further Properties  
Non-linear Internal Waves  
Partial Differential Equations that Lead to Solitons  
Shallow Water Waves and Solitary Waves  
Soliton Perturbation  
Solitons and Compaelons  
Solitons Interactions  
Solitons, Introduction to  
Solitons, Tsunamis and Oceanographical Applications of  
Solitons: Historical and Physical Introduction  
Water Waves and the Korteweg-de Vries Equation

### **Statistical and Nonlinear Physics, Section Editor: M. Cristina Marchetti**

Anisotropic Networks, Elastomers and Gels  
Cell Biology: Networks, Regulation and Pathways  
Chaotic Dynamics in Nonequilibrium Statistical Mechanics  
Collective Transport and Depinning  
Complex Systems and Emergent Phenomena  
Cytoskeleton and Cell Motility  
Disordered Elastic Media  
Econophysics, Statistical Mechanics Approach to  
Fluctuation Theorems, Brownian Motors and Thermodynamics of Small Systems  
Glasses and Aging, A Statistical Mechanics Perspective on  
Granular Flows  
Jamming of Granular Matter  
Jerky Motion in Slowly Driven Magnetic and Earthquake Fault Systems, Physics of  
Microfluidics  
Monte Carlo Simulations in Statistical Physics  
Networks: Structure and Dynamics  
Neuronai Dynamics  
Noise and Stability in Modeiocked Soliton Lasers  
Non-linear Fluid Flow, Pattern Formation, Mixing and Turbulence  
Optimization Problems and Algorithms from Computer Science

Polymer Physics  
Protein Mechanics at the Single-Molecule Level  
Quantum Chaos  
Statistical and Non-linear Physics, Introduction to  
Ultracold Atomic Gases: Novel States of Matter

### **Synergetics, Section Editor: Hermann Haken**

Brain Pacemaker  
Fluid Dynamics, Pattern Formation  
Fluid Dynamics, Turbulence  
Intentionality: A Naturalization Proposal on the Basis of Complex Dynamical Systems  
Linear and Non-linear Fokker-Planck Equations  
Movement Coordination  
Patterns and Interfaces in Dissipative Dynamics  
Self-Organization and Clinical Psychology'  
Self-Organization and the City  
Synergetics, Introduction to  
Synergetics: Basic Concepts

### **System Dynamics, Section Editor: Brian Dangerfield**

Business Policy and Strategy, System Dynamics Applications to  
Delay and Disruption in Complex Projects  
Diffusion of Innovations, System Dynamics Analysis of the  
Dynamics of Income Distribution in a Market Economy: Possibilities for Poverty Alleviation  
Group Model Building  
Health Care in the United Kingdom and Europe, System Dynamics Applications to  
Health Care in the United States, System Dynamics Applications to  
Public Policy, System Dynamics Applications to  
Scenario-Driven Planning with System Dynamics  
System Dynamics and Its Contribution to Economics and Economic Modeling  
System Dynamics and Organizational Learning  
System Dynamics in the Evolution of the Systems Approach  
System Dynamics Modeling: Validation for Quality Assurance  
System Dynamics Models of Environment, Energy and Climate Change  
System Dynamics Models, Optimization of  
System Dynamics Philosophical Background and Underpinnings  
System Dynamics, Analytical Methods for Structural Dominance Analysis in  
System Dynamics, Introduction to  
System Dynamics, The Basic Elements of

### **Systems and Control Theory, Section Editor: Matthias Kawski**

Chronological Calculus in Systems and Control Theory  
Discrete Control Systems  
Finite Dimensional Controllability  
Flybrid Control Systems  
Learning, System Identification, and Complexity  
Maximum Principle in Optimal Control  
Mechanical Systems: Symmetries and Reduction  
Nonsmooth Analysis in Systems and Control Theory  
Observability (Deterministic Systems) and Realization Theory

Robotic Networks, Distributed Algorithms for  
Stability and Feedback Stabilization  
Stochastic Noises, Observation, Identification and Realization with  
System Regulation and Design, Geometric and Algebraic Methods in  
Systems and Control, Introduction to

## Systems Biology, Section Editor: Timothy P. Galitski

Biological Data Integration and Model Building  
Biological Models of Molecular Network Dynamics  
Biomolecular Network Structure and Function  
Boolean Modeling of Biological Networks  
Ecological Systems  
Functional Genomics for Characterization of Genome Sequences  
Genome Organization  
Metabolic Systems Biology  
Stochastic Models of Biological Processes  
Systems Biology of Human Immunity and Disease  
Systems Biology, Introduction to  
Systems Genetics and Complex Traits

i

## Traffic Management, Complex Dynamics of, Section Editor: Boris Kerner

Air Traffic Control, Complex Dynamics of  
Complex Dynamics of Traffic Management, Introduction to  
Evacuation as a Communication and Social Phenomenon  
Evacuation Dynamics: Empirical Results, Modeling and Applications  
Freeway Traffic Management and Control  
Pedestrian, Crowd and Evacuation Dynamics  
Traffic Breakdown, Probabilistic Theory of  
Traffic Congestion, Modeling Approaches to  
Traffic Congestion, Spatiotemporal Features of  
Traffic Networks, Optimization and Control of Urban  
Traffic Networks: Dynamic Traffic Routing, Assignment, and Assessment  
Traffic Prediction of Congested Patterns  
Travel Behaviour and Demand Analysis and Prediction

i i

## Unconventional Computing, Section Editor: Andrew Adamatzky

Amorphous Computing  
Analog Computation  
Artificial Chemistry  
Bacterial Computing  
Cellular Computing  
Computing in Geometrical Constrained Excitable Chemical Systems  
Computing with Solitons  
DNA Computing  
Evolution in Materio  
Immunocomputing  
Mechanical Computing: The Computational Complexity of Physical Devices  
Membrane Computing  
Molecular Automata  
Nanocomputers

Optical Computing  
Quantum Computing  
Reaction-Diffusion Computing  
Reversible Computing  
Thermodynamics of Computation  
Unconventional Computing, Introduction to  
Unconventional Computing, Novel Hardware for

**Wavelets, Section Editor: Edward Aboufadel**

Bivariate (Two-dimensional) Wavelets  
Comparison of Discrete and Continuous Wavelet Transforms  
Curvelets and Ridgelets  
Multivariate Splines and Their Applications  
Multiwavelets  
Numerical Issues When Using Wavelets I  
Popular Wavelet Families and Filters and Their Use  
Statistical Applications of Wavelets  
Wavelets and PDE Techniques in Image Processing, A Quick Tour of  
Wavelets and the Lifting Scheme  
Wavelets, Introduction to
