

ENCYCLOPEDIA OF EARTH SCIENCES SERIES

ENCYCLOPEDIA *of* HYDROLOGY AND WATER RESOURCES

edited by

**REGINALD W. HERSCHY *and*
RHODES W. FAIRBRIDGE**

KLUWER ACADEMIC PUBLISHERS

DORDRECHT / BOSTON / LONDON

Contents

List of contributors	xii	Aral Sea	70
Foreword	xvii	<i>R.W. Herschy</i>	
Preface	xviii	Arid climates	70
Acknowledgements	xix	<i>R.W. Durrenberger</i>	
Selected international journals in hydrology and water resources	xx	Aridity indices	78
Units, symbols and conversion factors	xxii	<i>Stephen J. Stadler</i>	
Access to and accountability of water resources	1	Arid lands	83
<i>R.W. Herschy</i>		<i>Peter G. Fookes</i>	
Accuracy	3	Arid zone hydrology	87
<i>R.W. Herschy</i>		<i>Denis A. Hughes</i>	
Accuracy of hydrodynamic approximations in hydrology: non-uniform, steady flow	11	Asia: climate	89
<i>V.P. Singh and V. Aravamuthan</i>		<i>William A. Dando</i>	
Accuracy of hydrodynamic approximations in hydrology: unsteady, uniform flow	26	Atmosphere	95
<i>V.P. Singh</i>		<i>C.G. Collier</i>	
Acidic deposition: acidification of surface waters	34	Atmospheric processes associated with water in the atmosphere	96
<i>M. Robbins Church</i>		<i>C.G. Collier</i>	
Acid rain	36	Atmospheric water vapor	98
<i>John E. Oliver</i>		<i>C.G. Collier</i>	
Activated sludge process: historical	38	Australia: climate and water resources	98
<i>R.W. Herschy</i>		<i>Howard A. Bridgman</i>	
Activated sludge process	38	Australian flood studies	109
<i>James R. Simpson</i>		<i>Elizabeth M. Shaw</i>	
Africa: climate	43	Bernoulli energy equation	111
<i>John F. Griffiths</i>		<i>Philip G. Holland</i>	
Agroclimatology	50	Biosphere	111
<i>Jen-Hu Chang</i>		<i>Rhodes W. Fairbridge</i>	
Albedo and reflectivity	53	Black Sea environment	111
<i>Samuel N. Goward</i>		<i>R.W. Herschy</i>	
Algal growth on lakes	56	Bottled water	112
<i>R.W. Herschy</i>		<i>R.W. Herschy</i>	
Alluvial valley engineering	56	Caspian Sea	113
<i>Charles R. Kolb</i>		<i>R.W. Herschy</i>	
Amazon River	63	Central America and West Indies: climate	113
<i>Rhodes W. Fairbridge</i>		<i>George R. Rumney and John E. Oliver</i>	
Antarctic ozone hole	64	Channelization and bank stabilization	117
<i>Jonathan Shanklin</i>		<i>M.P. Mosley</i>	
Antecedent precipitation	69	Chézy formula	121
<i>Denis A. Hughes</i>		<i>P.G. Holland</i>	
Aquifer	69	Chilgrove House well, UK	121
<i>Charlotte Schreiber</i>		<i>Terry J. Marsh</i>	
		Climate and climate change	122
		<i>C.G. Collier</i>	
		Climate change and ancient civilization	130
		<i>Masatoshi M. Yoshino</i>	

Climate change and the greenhouse effect <i>R.W. Herschy</i>	134	Drought management <i>Susan Walker</i>	214
Climate data: sources <i>Howard J. Critchfield</i>	139	Droughts <i>T.C. Sharma</i>	215
Climate forecasting: monthly and seasonal <i>Donald L. Gilman</i>	142	Echo sounding <i>P.G. Holland</i>	222
Clouds (cloud seeding) <i>C.G. Collier</i>	143	El Niño <i>William H. Quinn</i>	222
Colebrook-White equation <i>P.G. Holland</i>	144	Energy head <i>P.G. Holland</i>	225
Computer models <i>Denis A. Hughes</i>	144	Entropy in environmental and water resources <i>N.B. Harmancioglu and V.P. Singh</i>	225
Conveyance <i>P.G. Holland</i>	145	Environmental priorities for development: water <i>R.W. Herschy</i>	241
Correlation coefficient <i>A.H. Schumann</i>	145	Estuarine hydrology <i>R.E. Stevenson</i>	244
Current metering <i>P.G. Holland</i>	145	Europe, climate: a hydrological perspective <i>Keith R. Boucher</i>	248
Cyanobacteria (blue-green algae) <i>Alan Howard</i>	147	Evaporation: measurement <i>W.C. Swinbank</i>	264
Dams <i>Eric Best</i>	149	Evapotranspiration <i>John E. Oliver</i>	266
Dams: failure <i>R.W. Herschy</i>	153	Everglades, Florida, USA <i>Thomas D. Fontaine</i>	271
Dams: world <i>R.W. Herschy</i>	155	Experimental basin <i>Mark Robinson</i>	272
Danube River: hydrology and geography <i>Petre Găstescu</i>	159	Float <i>P.G. Holland</i>	275
Danube River: development <i>Ö. Starosolszky</i>	161	Flood estimation: methods for developing countries <i>R.W. Herschy</i>	275
Data processing in hydrology <i>Denis A. Hughes</i>	162	Flood frequency analysis <i>David Archer</i>	279
Deltaic plains <i>Charles R. Kolb</i>	163	Flood hazard management <i>Colin Green</i>	288
Density for a minimum network of hydrological stations <i>World Meteorological Organization</i>	172	Floods <i>Robert L. Wright</i>	293
Desalination <i>R.W. Herschy</i>	174	Floods: largest in USA, China and the world <i>R.W. Herschy</i>	298
Desert hydrology <i>Sharon E. Nicholson</i>	176	Flood studies for the British Isles <i>Elizabeth M. Shaw</i>	300
Desertification <i>Sharon E. Nicholson</i>	183	Flood studies worldwide <i>Elizabeth M. Shaw</i>	301
Deserts <i>Sharon E. Nicholson</i>	186	Floods: river and multi-stage channels <i>D.A. Ervine and A.B. MacLeod</i>	302
Design flood assessment <i>Elizabeth M. Shaw</i>	197	Floods: world's maximum observed <i>R.W. Herschy</i>	311
Dew <i>Rhodes W. Fairbridge and John E. Oliver</i>	197	Florida Bay: status and restoration <i>David. T. Rudnick</i>	312
Dewpoint <i>Rhodes W. Fairbridge and John E. Oliver</i>	197	Flow measurement: new technology <i>David W. Gibbard</i>	313
Dew ponds <i>R.W. Herschy</i>	197	Flow through weirs, flumes, orifices, sluices and pipes <i>R.W. Herschy</i>	319
Drainage <i>Mark Robinson</i>	202	Flume <i>P.G. Holland</i>	330
Drawdown, cone of depression <i>Charlotte Schreiber</i>	203	Fog and mist <i>John A. Day</i>	334
Drinking water and sanitation <i>R.W. Herschy</i>	204	Frequency analysis <i>World Meteorological Organization</i>	335
Drought <i>Donald Steila</i>	204	Frost <i>Benjamin Moulton</i>	337
Drought in Western Europe, 1988-1992 <i>T.J. Marsh</i>	211	Froude number <i>P.G. Holland</i>	338

Gauge (gage) <i>P.G. Holland</i>	339	International rivers <i>R.W. Herschy</i>	432
Gauging station <i>P.G. Holland</i>	340	International standards in flow measurement <i>G.G. Robson</i>	440
Ghyben–Herzberg theory <i>Roger J.M. De Wiest</i>	340	Irrigated land area: world <i>R.W. Herschy</i>	442
Global positioning system (GPS): overview <i>R.W. Herschy</i>	341	Irrigation and drainage <i>World Meteorological Organization</i>	444
Global warming <i>R.W. Herschy</i>	342	Karst hydrology <i>William Back</i>	447
Greenhouse effect: general <i>Zbigniew W. Kundzewicz</i>	342	Kissimmee River, Florida, USA <i>Louis A. Toth</i>	450
Greenhouse effect <i>A. John Arnfield</i>	343	Lakes <i>Alec J. Smith</i>	451
Groundwater <i>Michael Price</i>	345	Lake Balaton, Hungary <i>Ó. Starosolszky</i>	454
Groundwater: UK <i>R.W. Herschy</i>	348	Lake Chad <i>J.H. Sircoulon</i>	455
Hydroclimatology <i>Wayne M. Wendland</i>	357	Lakes: effects on climate <i>Val L. Eichenlaub</i>	455
Hydrodynamics: porous media <i>Adrian E. Scheidegger</i>	360	Lakes, lake water <i>Petre Gâştescu</i>	459
Hydro-ecology: PHABSIM <i>R.W. Herschy</i>	361	Lakes: largest worldwide <i>R.W. Herschy</i>	461
Hydrogeology <i>F.C. Brassington</i>	363	Land-use change <i>A.H. Schumann</i>	466
Hydrogeology: history in USA <i>William Back</i>	366	Limnology: definition <i>Petre Gâştescu</i>	467
Hydrological cycle <i>Robert M. Horden</i>	367	Limnology <i>Gerald A. Cole</i>	468
Hydrological mapping <i>Gary D. Bishop and M. Robbins Church</i>	371	Lough Neagh, UK <i>P.G. Holland</i>	473
Hydrological services <i>World Meteorological Organization</i>	374	Manning formula <i>P.G. Holland</i>	475
Hydrological yearbooks <i>T.J. Marsh</i>	377	Maritime climate, oceanicity <i>Rhodes W. Fairbridge and John E. Oliver</i>	475
Hydrologists (600 BC–AD 1900) <i>R.W. Herschy</i>	378	Maritime zones <i>Brian Goodall</i>	477
Hydrology <i>Keith Smith</i>	400	Mathematical models <i>Zbigniew W. Kundzewicz</i>	479
Hydrology: coastal terrain <i>Stuart A. Harris</i>	404	Maximum observed rainfalls <i>R.W. Herschy</i>	480
Hydrology: lakes and reservoirs <i>V.S. Vuglinsky</i>	407	Mean annual runoff: correlation with catchment characteristics <i>R.W. Herschy</i>	481
Hydrology: subsurface waters <i>Roger J.M. De Wiest</i>	407	Medicinal springs <i>Igho H. Kornblueh and Rhodes W. Fairbridge</i>	481
Hydromechanics <i>Michael E. McCormick</i>	410	Mediterranean climate <i>Kamlesh P. Lulla</i>	482
Hydrometeorology <i>C.G. Collier</i>	411	Meteorology <i>C.G. Collier</i>	483
Hydropower and energy-related projects <i>World Meteorological Organization</i>	411	Mixing <i>Ó. Starosolszky</i>	483
Hydrosphere <i>Rhodes W. Fairbridge</i>	416	Modeling of water resource systems <i>Susan Walker</i>	484
Infiltration: introduction <i>A.H. Schumann</i>	418	Model predictions: uncertainty <i>Keith Beven</i>	486
Infiltration <i>J.R. Philip</i>	418	Models: distributed models of catchment hydrology <i>Keith Beven</i>	489
International databases <i>World Meteorological Organization</i>	426	Models: parameter estimation <i>Keith Beven</i>	492
International organizations involved with hydrology and water resources <i>World Meteorological Organization</i>	427	Monsoon climates <i>C.S. Ramage</i>	494

Multi-parameter data loggers <i>World Meteorological Organization</i>	496	Saltwater wedge <i>P.G. Holland</i>	587
Natural disasters <i>R.W. Herschy</i>	497	Sand dunes <i>Sharon E. Nicholson</i>	587
North America: climate <i>George R. Rumney</i>	498	Sanitation and clean water <i>R.W. Herschy</i>	588
Okeechobee Lake, Florida, USA: human impacts, research and lake restoration <i>Nicholas G. Aumen and Karl E. Havens</i>	505	Satellite hydrology: present trends and outstanding needs <i>Eric C. Barrett</i>	596
Orographic precipitation <i>James L. Guernsey</i>	506	Savanna <i>Sharon E. Nicholson</i>	599
Paleohydrology <i>Deborah Anthony and Ellen Wohl</i>	508	Sea level: mean <i>Clifford Embleton</i>	600
Permafrost <i>Troy I. Péwé</i>	511	Seiche <i>P.G. Holland</i>	601
Perrault, Pierre (1611–1680) <i>J.H. Sircoulon</i>	523	Semiarid regions <i>David J. Burdon</i>	601
Population displacement due to dam construction <i>R.W. Herschy</i>	523	Sewage treatment: general introduction <i>Diane Ireland</i>	607
Prandtl–von Karman equation <i>P.G. Holland</i>	524	Sewage treatment processes <i>R.W. Herschy</i>	608
Precipitation <i>Louis J. Battan</i>	524	Sink, sinkhole, swallow hole <i>Rhodes W. Fairbridge</i>	617
Precipitation distribution <i>Orman E. Granger</i>	525	Snow measurement <i>David Archer</i>	618
Precipitation: source <i>C.G. Collier</i>	530	Snow <i>C.G. Collier</i>	621
Probability of a hydrological event occurring in a given time interval <i>World Meteorological Organization</i>	530	Snowfall and snow cover: recent variations in northern high latitudes, present status of research and relevance to the climate change problem <i>Pavel Ya. Groisman</i>	624
Qinghaihu Lake, China <i>Jing Yueling and Cui Dewei</i>	532	Soil and water management <i>Robert L. Wright</i>	626
Radar: precipitation-measuring (weather) radar in Europe <i>R.W. Herschy</i>	539	South America <i>Rhodes W. Fairbridge</i>	628
Rain <i>C.G. Collier</i>	540	Springs <i>O.M. Hackett</i>	629
Raingauge <i>Mark Robinson</i>	548	Stage–discharge relation <i>R.W. Herschy</i>	631
Rain shadow: general <i>A.H. Schumann</i>	549	Storms: brief definitions <i>R.W. Herschy</i>	634
Rain shadow <i>Sharon E. Nicholson</i>	549	Streamflow measurement <i>R.W. Herschy</i>	635
Razim–Sinoie lake complex, Romania <i>Petre Gâstescu</i>	549	Surfacewater yield calculation <i>Susan Walker</i>	637
Relative humidity <i>Rhodes W. Fairbridge</i>	551	Suspended sediment monitoring: use of acoustic Doppler current profiler <i>Günther Reichel</i>	638
Remote sensing (1) <i>Gareth Roberts</i>	552	Thames Barrier <i>R.W. Herschy</i>	645
Remote sensing (2) <i>Jean-Yves Scanvic and Philippe Dutartre</i>	557	Thames, River <i>T.J. Marsh</i>	647
Remote sensing data: use in hydrological modeling <i>Catherine Otlé</i>	559	Thames Water Ring Main <i>R.W. Herschy</i>	648
Reservoir capacity estimation <i>World Meteorological Organization</i>	564	Thiessen polygon <i>A.H. Schumann</i>	648
Reynolds number <i>P.G. Holland</i>	569	Trafalgar Square borehole, London, UK <i>T.J. Marsh</i>	649
River engineering <i>G. Pender</i>	569	Tree-rings in hydrological studies <i>Thomas M. Yanosky and Malcolm K. Cleaveland</i>	650
Rivers <i>R.W. Herschy</i>	571	Tree-rings: Fortingall yew tree, UK <i>R.W. Herschy</i>	655
River pollution prevention: historical <i>R.W. Herschy</i>	584	United States Geological Survey: National Water-Use Information Program <i>R.W. Herschy</i>	657
Sahel region: climate and hydrology <i>J.H. Sircoulon</i>	585		

Unit hydrograph method in UK flood studies <i>Elizabeth M. Shaw</i>	659	Water resources: international <i>V.S. Vuglinsky</i>	716
Unsteady flow model for computing streamflow <i>United States Geological Survey</i>	660	Water resources: dictionary of basic terms <i>P.G. Holland and R.W. Herschy</i>	717
Urban hydrology <i>Philip E. LaMoreaux and Lois D. George</i>	666	Water resources: Europe <i>R.W. Herschy</i>	732
Velocity–area method <i>R.W. Herschy</i>	668	Water resources: integrated river basin management <i>David H. Newsome</i>	748
Water on Earth and other planets <i>Rhodes W. Fairbridge</i>	671	Water resources: natural quality <i>R.W. Herschy</i>	749
Water agencies: national and international <i>Arthur J. Askew</i>	673	Water resources: quality assessment <i>R.W. Herschy</i>	749
WaterAid <i>R.W. Herschy</i>	674	Water resources: surface and groundwater <i>R.W. Herschy</i>	757
Water allocation and use <i>R.W. Herschy</i>	676	Water: substance and solvent <i>Donald Langmuir and H.L. Barnes</i>	762
Water availability and river water quality <i>R.W. Herschy</i>	677	Water table <i>Michael Price</i>	765
Water balance <i>Robert M. Hordon</i>	679	Water treatment: potable water <i>Peter Price</i>	765
Water budget analysis <i>Robert A. Muller and John M. Grymes III</i>	681	Water use <i>Philip Turton</i>	770
Water: categories <i>Rhodes W. Fairbridge</i>	687	Water use in the USA <i>R.W. Herschy</i>	775
Water charges (UK): abstractions and discharges <i>R.W. Herschy</i>	688	Weathering <i>Rhodes W. Fairbridge</i>	784
Water divining (1) <i>F.C. Brassington</i>	689	Weber number <i>P.G. Holland</i>	785
Water divining (2) <i>R.W. Herschy</i>	690	Weir: flow measurement <i>P.G. Holland</i>	785
Waterfalls <i>R.W. Herschy</i>	695	World water balance <i>R.W. Herschy</i>	787
Water inventory <i>V. Vuglinsky</i>	698	Yangtze Three Gorges Dam, China <i>R.W. Herschy</i>	791
Water movement in unsaturated soils <i>J.R. Philip</i>	699	Author index	793
Water quality for drinking: WHO guidelines <i>R.W. Herschy</i>	706	Subject index	797
Water resources: introduction <i>J.A. Cole</i>	712
