# Multicriteria Optimization

Springer

# Contents

1.	Introduction	1
1.1	Optimization with Multiple Criteria	1
1.2	Decision Space and Objective (Criterion) Space	3
1.3	Notions of Optimality	6
1.4	Orders and Cones	7
1.5	Classification of Multicriteria Optimization Problems	13
	Exercises	16
2.	<b>Pareto Optimality and Efficiency</b>	19
2.1	Pareto Optimal Solutions and Efficient Points	19
2.2	Weakly and Strictly Pareto Optimal Solutions	28
2.3	Proper Pareto Optimality and Proper Efficiency	38
	Exercises	52
3.	<b>Weighted Sum Scalarization</b>	55
3.1	Scalarization and Efficiency	57
3.2	Scalarization and Weak Efficiency	58
3.3	Scalarization and Proper Efficiency	60
3.4	Connectedness of $Y_{\text{eff}}$ and $X_{\text{par}}$	68
	Exercises	74
4.	<b>Other Methods for Pareto Optimality</b>	77
4.1	Bounds on the Efficient Set	77
4.2	The e-Constraint Method	82
4.3	Benson's Method	85
4.4	Compromise Solutions — Approximation of the Ideal Point	90
	Exercises	100
5.	<b>Multicriteria Linear Programming</b>	103
5.1	Introduction	103
5.2	Theory of Multicriteria Linear Programming	111
5.3	A Multicriteria Simplex Algorithm	118
5.4	Identifying Scalarizing Vectors and Pareto Faces	127
	Exercises	132

<b>6. Other Optimality Concepts</b> .....	<b>.135</b>
6.1 Lexicographic Optimization .....	.135
6.2 Max-Ordering Optimization .....	.138
6.3 Lexicographic Max-Ordering Optimization .....	.141
Exercises .....	.152
<b>7. Combinatorial Problems with Multiple Objectives</b> .....	<b>.153</b>
7.1 Introduction .....	.153
7.2 Finite Problems: The Case $X = E$ .....	.161
7.3 The Shortest Path Problem .....	.166
7.4 The Minimum Spanning Tree Problem and Matroids .....	.178
7.5 The Assignment Problem .....	.193
7.6 The Knapsack Problem .....	.204
7.7 The Travelling Salesperson Problem .....	.211
Exercises .....	.221
<b>Bibliography</b> .....	<b>.223</b>
<b>List of Figures</b> .....	<b>.229</b>
<b>List of Tables</b> .....	<b>.233</b>
<b>Author Index</b> .....	<b>.235</b>
<b>Subject Index</b> .....	<b>.237</b>
