Contents

Foreword by Tarcisio Alvarez-Rivero, UNDESA	v
Acknowledgments	ix
List of Abbreviations	xv
List of Figures	xvii
List of Tables	xix
Executive Summary	xxi
 1 What Is EMA and Why Is It Relevant?	 1
1.1 The Issues Behind EMA.....	1
1.2 Challenges for Current Accounting Practices	5
1.2.1 Communication Between Accounting and Production Departments.....	6
1.2.2 Missing Links Between the Production Planning and Financial Information System	7
1.2.3 Hiding Environmental Costs in Overhead Accounts.....	7
1.2.4 Posting of Inventory Differences.....	8
1.2.5 Investment Appraisal Based on Incomplete Information	9
1.3 Definition of Environmental Costs and Environmental Management Accounting (EMA).....	10
1.4 Monetary Accounting.....	16
1.5 Physical Accounting	18
1.6 EMA Links to Financial, Statistical, Environmental and Sustainability Reporting Requirements.....	23
1.6.1 The EC Recommendation and the EU Directive on Environmental Issues in Company Annual Accounts and Reports.....	24
1.6.2 The UN System of Integrated Environmental and Economic Accounting (SEEA) and Classification of Environmental Protection Expenditure (CEPA)	26

1.6.3	The Guidelines of the Global Reporting Initiative (GRI).....	30
1.7	EMA Uses and Benefits	33
2	The Input Side of the Material Flow Balance	37
2.1	Overview on Material Flow Balances	37
2.2	Raw Materials.....	39
2.3	Auxiliary Materials.....	40
2.4	Merchandise	40
2.5	Packaging	41
2.6	Operating Materials	41
2.7	Energy.....	43
2.8	Water	43
3	The Output Side of the Material Flow Balance.....	45
3.1	Products and By-products.....	45
3.2	Non-product Outputs (Waste and Emissions)	46
3.2.1	Waste	46
3.2.2	Waste Water.....	47
3.2.3	Air Emissions.....	48
4	Environmental Performance Indicators	49
4.1	ISO 14031—Standard on Environmental Performance Evaluation.....	50
4.2	Environmental Performance Indicators of GRI.....	51
4.3	General Requirements for Indicator Systems	51
4.3.1	Relevance	53
4.3.2	Understandability.....	53
4.3.3	Target Orientation.....	53
4.3.4	Consistency.....	53
4.3.5	Comparability	54
4.3.6	Balanced View.....	54
4.3.7	Continuity	55
4.4	System Boundaries for Performance Indicators	55
4.5	The Problem of Finding a Meaningful Denominator	56
4.5.1	Specific Consumption/Eco-intensity	59
4.5.2	Eco-efficiency Ratios.....	59
4.5.3	Percentage Distribution	61
4.6	Calculating Savings Based on Performance Indicators.....	62
5	Environmentally Relevant Equipment.....	65
5.1	Classification of Environmentally Relevant Equipment	67
5.1.1	End-of-Pipe Equipment	68

5.1.2	Integrated Cleaner Technologies	69
5.1.3	Scrap Producing Equipment and Energy Conversion Losses	71
5.2	Environmental Investments According to SEEA and CEPA	72
6	Monetary Information	75
6.1	Overview on the EMA Cost Categories in the Excel Template for Total Annual Environmental Costs	76
6.2	Distribution by Environmental Domain	78
6.3	Material Costs of Non-product Output	79
6.3.1	Estimating Loss Percentages	80
6.3.2	Calculating Processing Costs of NPO	81
6.4	Waste and Emission Control Costs	82
6.4.1	Equipment Depreciation	82
6.4.2	Operating Materials, Water and Energy	83
6.4.3	Internal Personnel	83
6.4.4	External Services	84
6.4.5	Fees, Taxes and Permits	84
6.4.6	Fines	85
6.4.7	Insurance	86
6.4.8	Remediation and Compensation	86
6.5	Costs for Prevention and Other Environmental Management Costs	87
6.5.1	Equipment Depreciation	88
6.5.2	Operating Materials, Water and Energy	89
6.5.3	Internal Personnel	89
6.5.4	External Services	90
6.5.5	Other Costs	90
6.6	Research and Development Costs	90
6.7	Environmental Earnings and Savings	91
6.8	Case Study of SCA Laakirchen Pulp and Paper Plant	91
7	Linking Physical and Monetary Information	97
7.1	Environmental Expenditure in the Profit and Loss Statement	97
7.2	Improving the Consistency of Materials Inputs and Product and Non-Product Output	100
7.3	Tracing Materials in Corporate Information Systems	106
7.4	Cost Accounting Basics and Terminology	109
7.5	Mapping Costs Centers, Production Planning and Technical Monitoring	112
7.6	Activity Based Costing	113
7.7	Material Flow Cost Accounting (MFCA)	116
7.8	Investment Appraisal and Budgeting	120
7.8.1	Capital Budgeting Basics	121

7.8.2	Calculation Sheet for Environmental Investments and Savings	123
7.9	Benchmarking Production Sites	125
8	Case Study of a Brewery	131
8.1	Working with the EMA Excel Templates	131
8.2	The Material Flow Balance	132
8.3	The Brewery, Its Production Flow and Cost Centers	135
8.4	Total Annual Environmental Costs	136
9	How to Organize an EMA Pilot Project.....	161
9.1	Defining System Boundaries and Sites for Pilot Testing	161
9.2	Developing a Project Plan	164
9.3	Extracting EMA Data from Enterprise Resource Planning Systems	166
9.4	Elements of an Internal EMA Standard.....	170
9.4.1	Objectives and Scope.....	173
9.4.2	Definitions	174
9.4.3	Responsibilities.....	174
9.4.4	Material Flow Data (Input-Output Analysis)	175
9.4.5	Environmental Cost Categories and Assessments.....	175
9.4.6	Procedure for Data Gathering	176
9.4.7	Internal Reporting	177
9.4.8	External Reporting.....	178
9.4.9	Appendix: Excel Templates for EMA Assessment by Business Groups.....	178
9.5	Summary of Recommendations from Case Studies	179
9.5.1	Data Collection of Material Purchase by Material Groups in Financial Accounting	179
9.5.2	Estimation and Recalculation of Material Scrap Percentages.....	180
9.5.3	Depreciation of Projects/Investments Before the First Year of Cost Assessment	180
9.5.4	Distinction to Health and Safety and Risk Management.....	181
9.5.5	Product Oriented Pollution Prevention.....	181
9.5.6	New Cost Centers and Accounts	181
9.6	Outlook.....	182
	References.....	185
	Index.....	189
