Contents

1 Introduction	1
1.1 The Emerging Giant	1
1.2 The Problems	2
1.3 What We Do	4

Part I Macroeconomic Development and the Environment

2 Economic Development and Environment	11
2.1 Introduction	11
2.2 Country Profile	12
2.2.1 Geographical Profile	12
2.2.2 Physiographic Conditions	12
2.2.3 Sociocultural Conditions	13
2.2.4 Indian Polity and Governance	13
2.3 Macroeconomic Growth	14
2.4 Poverty and Regional Disparities	18
2.5 Depletion of Natural Resources and Environmental Degradation	23
2.6 Sustainability of Growth	28
2.7 Conclusions	35
3 Environmental Regulations and Compliance in India	37
3.1 Introduction	37
3.2 Environmental Regulations in India	38
3.2.1 Formal Regulations	40
3.2.2 The Institutional Framework for Environmental Management: A Brief History	41
3.2.3 Environmental Laws	42
3.2.4 Fiscal Instruments for Pollution Control in India	43

3.2.5	Review of Some Recent Studies.....	45
3.2.6	Informal Regulation and People's Participation	47
3.3	Current State of India's Environment	50
3.3.1	Water Pollution	51
3.3.2	Water Pollution from Households	52
3.3.3	Water Pollution Loads from Industries	52
3.3.4	Water Pollution from Agriculture	52
3.3.5	Effects of Water Pollution	53
3.3.6	Air Pollution	54
3.3.7	Land and Forests	55
3.3.8	Valuation of Environmental Degradation in India	57
3.4	Causes of Poor Environmental Compliance	58
3.5	Concluding Remarks	60
Appendix 1:	Key Environmental Legislation in India: An Illustrative List	61
Appendix 2:	Major Polluting Industries	62
Appendix 3:	Sector-wise Compliance Status of 17 Categories of Highly Pollutions Industries (June 2006)	63
4	Intergovernmental Fiscal Transfers and the Environment	65
4.1	Introduction	65
4.2	Theory of Fiscal Federalism and the Environment	67
4.2.1	Decentralization and the Environment	67
4.2.2	Designing Fiscal Transfers for Environmental Sustainability	69
4.3	Fiscal Federalism and the Environment in India	70
4.3.1	Fiscal Federalism in India	70
4.3.2	Fiscal Transfers and Provision of Environmental Services in India	72
4.4	Fiscal Options for Integration of Environmental Services into Fiscal Transfers	75
4.5	Integrating Ecological Indicators into Fiscal Transfers: An Illustration	76
4.6	Conclusions	80
Part II	Industrial Development and Benefits and Costs of the Environmental Regulations	
5	Total Factor Productivity of Indian Industry	85
5.1	Introduction	85
5.2	Measurement of Total Factor Productivity	87
5.3	Total Factor Productivity of Indian Industry	91
5.3.1	Technical Efficiency Estimates	93
5.3.2	Total Factor Productivity Estimates	94

5.3.3	Innovative States and Convergence	101
5.4	Conclusions	104
6	Valuing the Benefits of Air Pollution Abatement	107
6.1	Introduction	107
6.2	Panipat Thermal Power Station	109
6.3	Questionnaire and Survey Format	110
6.4	Application of Revealed Preference Method	112
6.4.1	The Model	112
6.4.2	Empirical Estimates of WTP	114
6.5	Application of Contingent Valuation Method	117
6.5.1	The Model	120
6.5.2	Results	121
6.6	Comparison Between WTP Obtained from CVM and Mitigation Behavior	123
6.7	Conclusions	124
7	Environmental Regulation and Production Efficiency	127
7.1	Introduction	127
7.2	Output Distance Function and Its Econometric Estimation	128
7.2.1	Econometric Output Distance Function	129
7.2.2	A Model for Determinants of Technical Inefficiency	130
7.3	Production Efficiency of Thermal-Power Sector in India	131
7.3.1	Data	131
7.3.2	Estimation Procedures and Results	132
7.3.3	Results	133
7.4	Conclusion	136
8	Cost of Environmentally Sustainable Industrial Development	139
8.1	Introduction	139
8.2	Measuring Cost of Sustainable Industrial Development	141
8.2.1	Output Distance Function	141
8.2.2	Derivation of Shadow Prices of Bad Outputs	142
8.2.3	Scale Economies	143
8.3	Estimation of Output Distance Function	143
8.3.1	Translog Output Distance Function and Data	143
8.3.2	Estimation of Output Distance Function: Programming Model	145
8.3.3	Stochastic Output Distance Function	146
8.4	Estimates of Shadow Prices, Scale Economies, and Technical Efficiency	150
8.4.1	Shadow Prices	150
8.4.2	Technical Efficiency	152
8.4.3	Scale Economies	153

8.5	Conclusion	154
Appendix:	Estimates of Shadow Price of BOD and COD and Technical Efficiency and Economics of Scale	155
9	Win-Win Opportunities and Environmental Regulation: Test of the Porter Hypothesis	157
9.1	Introduction	157
9.2	Methodology for Testing Porter Hypothesis	159
9.2.1	Output Distance Function Approach	160
9.2.2	Econometric Estimation of Distance Functions	161
9.2.3	Relationship Between Technical Inefficiency and Environmental Regulation	162
9.3	Data and Translog Distance Function	162
9.4	Results	163
9.5	Conclusion	166
10	Industrial Water Demand and Shadow Price	167
10.1	Introduction	167
10.2	Economic Model	169
10.3	Estimation Model	172
10.4	Data and Estimation Results	173
10.4.1	Shadow Price of Water	175
10.4.2	Analysis of Derived Demand for Water	176
10.5	Conclusions	179
 Part III Environmental Productivity, Oil Prices and Induced Innovations		
11	Environmental Productivity and Kuznets Curve	185
11.1	Introduction	185
11.2	Environmental Policies in India	187
11.3	Models	188
11.3.1	Measurement of Productivity	188
11.3.2	Kuznets Curve Relationship: Environmental Productivity and Income Level	191
11.4	Results	193
11.4.1	Productivity Analysis	193
11.4.2	Market Productivity	194
11.4.3	Joint Output Productivity	194
11.4.4	Environmental Productivity	195
11.4.5	Environmental Kuznets Curve Test	196
11.5	Concluding Remarks	200
Appendix:	TEP of SO ₂ of Indian States	200

12	A Global Analysis of Environmentally Sensitive Productivity Growth	203
12.1	Introduction	203
12.2	Measuring Environmentally Sensitive Productivity	205
12.2.1	Directional Distance Functions	207
12.2.2	Malmquist-Luenberger Productivity Index	207
12.2.3	Computation of Directional Distance Function	208
12.3	Data and Results	209
12.3.1	Conventional Measurement of Productivity	213
12.3.2	Environmentally Sensitive Measurement of Productivity	215
12.4	Conclusions	218
13	Macroeconomic Effects of Oil Price Shocks	221
13.1	Introduction	221
13.2	Oil Prices-Macroeconomy Relationship	222
13.2.1	Channels Through Which Oil Price Shocks May Affect the Macroeconomy	222
13.2.2	Oil Prices-Macroeconomy Relationship: Empirical Evidences	223
13.3	Oil Price Data	225
13.4	Measurement of Impact of Oil Prices on Macroeconomy	229
13.5	Empirical Results	232
13.5.1	Testing for Significance and Granger-Causality	233
13.5.2	Macroeconomic Impacts of Oil Price Shocks	234
13.6	Concluding Remarks	242
	Appendix:	242
14	Energy Prices and Induced Technological Progress	245
14.1	Introduction	245
14.2	Measurement of Technological Change	247
14.3	The Econometric Estimation	251
14.4	Data	253
14.4.1	Long-Term Energy Prices	254
14.5	Results	254
14.5.1	Levels of Inefficiency in the Countries	256
14.5.2	Technological Diffusion and Exogenous and Energy Price Induced Innovations	257
14.6	Summary and Conclusions	261
	Appendix: Average Annual Values of Luenberger Productivity Indicators	262

15 The Road Ahead	265
15.1 Findings	265
15.2 Climate Change Policy	270
15.3 What to Do?	273
Bibliography	275
Index	293
