

Max Keilbach

Spatial Knowledge Spillovers and the Dynamics of Agglomeration and Regional Growth

With 43 Figures and 21 Tables

Contents

1	Intro	oduction	n and Mot	ivation	1		
	1.1	Backgr	ound of th	e Analysis	1		
1.2 Contribution of the Book				he Book	2		
2	Why and How Does Economic Activity Grow?						
	An (An Overview of the Literature					
	2.1	Introd	uction		5		
	2.2	A Sum	A Summary of Growth Theory in the Neoclassical Tradition				
		2.2.1	The Mod	lel of Solow	5		
		2.2.2	The The	pry of Endogenous Growth	8		
			2.2.2.1	The Concept of Learning by Doing	9		
			2.2.2.2	Technological Change as an Intentional Process	10		
	2.3	Implic	ations of N	leoclassical and Endogenous Growth Theories for			
		Region	al Growth		13		
		2.3.1	Factor M	igration	13		
			2.3.1.1	Implications of the Solowian Growth Model	14		
			2.3.1.2	Implications of the Endogenous Growth Model	15		
		2.3.2	The Con	vergence Debate	16		
			2.3.2.1	The Hypotheses of Convergence	16		
			2.3.2.2	Critics of the Convergence Hypotheses	20		
	2.4	Summ	Immary and Conclusion		25		
3	Why	r and H	ow Does E	conomic Activity Concentrate in Space?			
	Ano	ther Ov	erview of 1	the Literature	29		
	3.1	Introduction			29		
	3.2	2 The Role of Transportation Costs			31		
		3.2.1	Thünen's	- Rings	31		
		3.2.2	Central I	lace Theory	33		
		3.2.3	Krugmar	i's Core-Periphery Model	36		
		3.2.4	A Heuris	tic Approach: The Idea of Economic Potential	40		

	3.3	3 The Role of Spatial Externalities in Production			41			
		3.3.1	The Godfa	athers: Externalities in the Works of Alfred Marshall				
			and Jane J	acobs	42			
		3.3.2	Models th	at Refer to Increasing Returns in Production	46			
		3.3.3	Models th	at Refer to Spatial Density	50			
		3.3.4	Models th	at Refer to Distance	56			
	3.4	Summa	ary and Cor	nclusion	59			
4	Spatial Knowledge Spillovers and the Dynamics of Agglomeration and							
	Regi	onal Gr	owth		61			
	4.1	Introdu	action	· · · · · · · · · · · · · · · · · · ·	61			
	4.2	Positive	e External E	ffects in Production. Properties and Implementation	64			
		4.2.1	Externalit	ies: General Definition and Properties	64			
		4.2.2	Functiona	I Implementation of Externalities	66			
	4.3	The M	odel		68			
		4.3.1	The Incid	ence of Spillovers Between Firms of One Region	68			
		4.3.2	The Incid	ence of Spillovers Between Regions	71			
			4.3.2.1	Dynamics of Factor Allocation if the Coefficient of				
				Spillover $\Delta = 0$	72			
			4.3.2.2	Dynamics of Factor Allocation if the Coefficient of				
				Spillover $\Delta > 0$	74			
	4.4	Marsh	allian Exteri	nalities and the Convergence of Regions	75			
		4.4.1	Converge	nce Properties of Firms	77			
		4.4.2	Converge	nce Properties of the Regional Aggregate of Firms	78			
		4.4.3	Converge	nce Properties of an Aggregate of Regions	79			
	4.5	Summ	ary and Co	nclusion	81			
5	Mar	shallian	Externalit	ies, Spatial Self-Organization and Regional Growth	L			
	– an	Agent	Based Appi	roach	83			
	5.1	Introd	ntroduction					
	5.2	Who (ho Organizes the Economy?					
	5.3	Cellula	ellular Automata as a Tool for Modelling Local Economic Interaction 8					
	5.4	Local Interaction and the Dynamics of Agglomeration						
		5.4.1	A Hybrid	Model	91			
		5.4.2	The Rule	s of the Automaton	91			
	5.5	Simulation Results			94			
		5.5.1	Results W	/hen Labour is Immobile	95			
			5.5.1.1	Evolution of the Automaton Under Decreasing				
				Returns in the R&D-Sector	95			
			5.5.1.2	Evolution of the Automaton Under Constant				
				Returns in the R&D-Sector	96			

Contents

			5.5.1.3	Evolution of the Automaton Under Increasing	7
