

Mario A. Maggioni

Clustering Dynamics and the Location of High-Tecfa-Fimis

With 44 Figures and 33 Tables

Physica-Verlag

A Springer-Verlag Company

Table of contents

Chapter 1 - Introduction.....	1
Chapter 2 - What do we know about the clustering of high-tech firms?.....	5
2.1 Do firms cluster?.....	5
2.2 How can clustering be detected?.....	6
2.2.1 Simple counts, percentages" and location maps.....	7
2.2.2 Relative vs. absolute effects.....	10
2.2.3 Measures of spatial concentration and inequality.....	11
2.2.4 The definition of clusters.....	15
2.3 Where do high-tech firms cluster?.....	20
2.3.1 Existing empirical evidence.....	20
2.3.2 New empirical evidence.....	22
2.3.3 Final remarks and observations.....	58
2.4 Appendix: data sources.....	59
Chapter 3 - Theoretical literature review.....	63
3.1 Introduction.....	63
3.2 "Classical" location theory.....	64
3.2.1 Least cost approach.....	64
3.2.2 "Demand side" approach.....	69
3.2.3 "Land utilisation" approach.....	70
3.3 General location equilibrium models and urban economic theory.....	71
3.3.1 Non-price interactions models.....	72
3.3.2 Monopolistic competition models.....	74
3.4 Game theory.....	76
3.5 Krugman and the new economic geography.....	77
3.6 Industrial geography.....	80
3.7 Technological infrastructure approach.....	82
3.8 Porter's competitive advantages.....	83
3.9 Jacobs and the economic history of cities.....	83
3.10 Diffusion theory.....	84
3.11 Path dependence, lock-in and informational cascades.....	86
3 12 Biological and ecological models.....	88

3.13	Concluding remarks.....	89
3.14	Moving forward.....	92
Chapter 4	- Modelling firms' location and cluster development	95
4.1	Introduction.....	95
4.2	Firm location processes and the development of clusters: a macro-economic (ecologically-derived) approach.....	96
4.2.1	The effect of previous locations on clustering dynamics.....	96
4.2.2	Locational benefits and costs and the development of an industrial cluster.....	97
4.2.3	A logistic model.....	100
4.2.4	Location process in a two-regions framework.....	106
4.2.5	Co-operative interactions.....	110
4.2.6	Multi-cluster interactions: some methodological remarks.....	115
4.3	Micro-economic foundation of ecological models: the role of expectations.....	117
4.3.1	Introduction.....	117
4.3.2	Subjective heterogeneity: the role of expectations.....	118
4.3.3	Entry dynamics.....	123
4.3.4	The initial critical mass.....	125
4.3.5	Firms.....	126
4.3.6	Exit dynamics.....	126
4.3.7	Concluding remarks.....	128
4.4	Cluster development policies in variable macro-economic conditions..	129
4.4.1	Introduction.....	129
4.4.2	Policy interventions for local development.....	130
4.4.3	The relevance of external macro-economic conditions.....	131
4.4.4	Variable macro-economic conditions.....	133
4.4.5	Optimal long run development policies.....	134
4.4.6	Concluding remarks.....	136
4.5	Firm location processes and cluster's development: a micro-economic (innovation diffusion derived) approach.....	137
4.5.1	Epidemic models.....	137
4.5.2	Rank models.....	140
4.5.3	Rank, stock and order effects in the location process.....	143

Chapter 5 - Survey of empirical literature.....	149
5.1 Why do firms cluster?.....	149
5.1.1 Agglomeration economies.....	151
5.1.2 Localised sources of demand and/or supply.....	152
5.1.3 Search costs reduction, diffusion, and informational cascades....	153
5.1.4 Increase in market power.....	154
5.2 How do firms cluster?.....	154
5.2.1 Relevance of innovative infrastructure.....	156
5.2.2 Relevance of urbanisation/agglomeration economies.....	157
5.2.3 Relevance of institutional framework and national characteristics.....	157
5.2.4 Relevance of the availability of skilled labour.....	158
5.2.5 Relevance of venture capital and financial institutions.....	158
5.2.6 Relevance of the quality of life.....	159
5.2.7 Relevance of the proximity of R&D plants to head quarters locations.....	159
5.2.8 Relevance of site reputation, prestige and business climate.....	160
5.2.9 Excellence and success do not necessarily bring success.....	161
5.3 How to study clustering?.....	161
5.3.1 Advantages and drawbacks of direct surveys.....	161
5.3.2 Advantages and drawbacks of statistical macro-level studies.....	162
5.3.3 Advantages and drawbacks of econometric analyses.....	163
5.3.4 Advantages and drawbacks of simulations.....	163
5.4 Final remarks.....	163
Chapter 6 - Empirical analyses of the location of high-tech firms and of cluster development.....	165
6.1 Introduction.....	165
6.2 The role of geographical benefits.....	166
6.2.1 Estimating the role of geographical benefits in determining location decisions.....	168
6.3 Clustering of firms or workers? Scale vs. agglomeration economies....	172
6.3.1 A rough indicator.....	173
6.3.2 A model.....	175
6.3.3 The data.....	176
6.3.4 The results.....	177
6.4 The growth of an isolated cluster.....	179
6.5 Competition and co-operation in the dynamic of clusters development	180
6.5.1 A model.....	181
6.6. Market structure and industrial specialization in the growth of high-tech clusters.....	186
6.6.1 A model.....	188

6.6.2 The data.....190

6.6.3 The results.....192

6.7 Why do high-tech firms cluster? Some empirical considerations194

Chapter 7 - Policy implications.....197

7.1 High-tech firms and local development policies.....197

7.2 Geographical versus agglomeration benefits.....199

7.3 Geographical benefits and firms location.....200-

7.4 Agglomeration benefits and firms location.....202

7.5 Entry versus growth policies.....205

7.6 The nature of the cluster (and its policy implications).....207

7.7 Policy instruments in actions: science parks and technopolis.....212

7.8 Guidelines for policy makers.....215

Chapter 8 - Conclusion and research agenda.....219

References.....221

Declaration.....237

Summary.....239

List of figures.....241

List of tables.....243
