

Engelbert Plassmann

# Econometric Modelling of European Money Demand

Aggregation, Cointegration, Identification

With 16 Figures and 24 Tables '

Physica-Verlag

A Springer-Verlag Company

# Table of Contents

<b>1</b>	<b>Introduction</b>	1
1.1	Motivation	2
1.2	Outline	7
<b>2</b>	<b>Econometric Modelling</b>	11
2.1	Data Generation and Statistical Inference	11
2.1.1	Definition of Probability Models	12
2.1.2	Interpretation of Probability Models	16
2.2	Statistical Inference and Economic Theory	20
2.2.1	Definition of Economic Models	20
2.2.2	Theoretical and Empirical Models	22
2.3	Econometric Methodologies	24
<b>3</b>	<b>Autoregressive Probability Models</b>	29
3.1	Scalar Sequences	29
3.1.1	Stationary AR Model	30
3.1.2	Nonstationary AR Model	33
3.1.3	Estimation and Testing	35
3.2	Vector Sequences	41
3.2.1	Stationary VAR Model	42
3.2.2	Nonstationary VAR Model	43
3.2.3	Estimation and Testing	49
<b>4</b>	<b>Structural ECM Models</b>	61
4.1	Just-Identification	64
4.1.1	Dynamic Stability	64
4.1.2	Structural ECM	67
4.2	Over-Identification	71
4.2.1	Constancy	73
4.2.2	Weak Exogeneity	74
4.2.3	Granger-Noncausality	75
4.2.4	Instability	77

5	Aggregation . . . . .	81	
5.1	Aggregation of Relations . . . . .	82	
5.1.1	Linear Aggregation of Static Linear Relations . . . . .	86	
5.1.2	Quasilinear Aggregation of Static Linear Relations....	89	
5.1.3	Aggregation and Cointegration . . . . .	91	
5.1.4	Simulation Evidence . . . . .	94	
5.2	Aggregation of Variables . . . . .	104	
5.2.1	Index Number Theory . . . . .	104	
5.2.2	Construction of European Aggregates . . . . .	106	
6	Empirical Money Demand . . . . .	113	
6.1	Probability Model for Germany . . . . .	114	
6.1.1	Data and Recent Literature . . . . .	114	
6.1.2	Scalar Autoregressive Modelling . . . . .	118	
6.1.3	Vector Autoregressive Modelling . . . . .	121	
6.2	Probability Model for Europe . . . . .	130	
6.2.1	Data and Recent 'Literature . . . . .	130	
6.2.2	Scalar Autoregressive Modelling . . . . .	137	
6.2.3	Vector Autoregressive Modelling . . . . .	140	
6.3	Money Demand in Germany and Europe . . . . .	147	
6.3.1	Conditional VAR Model . . . . .	148	
6.3.2	Structural ECM Model ____". . . . .	153	
6.3.3	Stability of Money Demand . . . . .	157	
7	Conclusions . . . . .	* . . . . .	163
A	Technical Appendix . . . . .	171	
A.I	Expansion of Polynomials . . . . .	171	
A.2	Granger Representation Theorem . . . . .	176	
A.3	Concentration of Likelihoodfunction . . . . .	178	
A.4	Aggregation of Indices . . . . .	181	
A.5	Identification of Cointegration Vectors . . . . .	183	
A.6	Invalid SECM for Germany . . . . .	" . . . . .	185
A.7	Data Sources . . . . .	*	186
	List of Abbreviations . . . . .	189	
	List of Mathematical Symbols . . . . .	191	
	References . . . . .	193
