What Hampers Part-Time Work?

An Empirical Analysis of Wages,
Hours Restrictions and Employment from a
Dutch-German Perspective

With 12 Figures
and 30 Tables

Table of Contents

1	Introduction	1
1.1	Motivation of the research questions.	1
1.2	What we know about work-sharing	7
1.3	Description of the data used in this book	13
1.4	Structure of the book	15
2	The part-time wage gap in Germany and the Netherlands	19
2.1	Introduction	19
2.2	Why should wages depend upon hours worked?	21
2.2.1	Brief discussion of some theoretical approaches.	22
2.2.2	Institutional framework and part-time wage gap.	25
2.3	Empirical methodology.	28
2.4	The specification of the econometric model.	31
2.5	Data sets, sample selection and definition of the variables....	35
2.6	Descriptive figures on working hours and wages.	38
2.7	Estimation results of the simultaneous model.	40
2.7.1	Models imposing a uniform wage-hours profile.	41
2.7.2	Models allowing for group-specific wage-hours profiles .	48
2.8	Summary and conclusions.	56
3	Does the part-time wage gap matter?	59
3.1	Introduction.	59
3.2	Data and some descriptive analyses.	62
3.3	The econometric model.	68

3.3.1	The discrete choice model of labor supply.	69
3.3.2	Calculating household net income.	71
3.3.3	Hours restrictions.	75
3.4	Estimation results.	78
3.4.1	Wage equations.	78
3.4.2	Labor supply models.	81
3.4.3	Elasticities.	89
3.5	Equalizing part-time and full-time wage rates.	92
3.6	Summary and conclusion.	94
4	Loosening hours restrictions.	97
4.1	Introduction.	97
4.2	German and Dutch employment systems and economic structures.	100
4.2.1	Unions and wages.	101
4.2.2	Recent trends in working-time policy.	102
4.2.3	Social security systems.	103
4.2.4	Active labor market policy.	105
4.2.5	Temporary workers.	106
4.2.6	Sectoral structure.	107
4.3	Descriptions of the data sets.	108
4.4	Comparing the match of desired and actual hours across countries.	109
4.5	A model of actual working hours.	116
4.5.1	Specification of the empirical model.	116
4.5.2	Some remarks about the endogeneity of desired hours.	120
4.5.3	A brief discussion of the estimation results.	121
4.6	Inference from the estimation results.	123
4.6.1	Changing distribution of working hours.	125
4.6.2	Effects on the match between desire and reality.	126
4.6.3	How about employment effects?.	130
4.7	Summary and conclusions.	131

5	Final conclusions and policy implications	135
A	Appendix to Chapter 2	141
	A.I Evaluation of the Likelihood Function	141
	A.2 Expected values of hourly wage rates in the simultaneous model	142
	A.3 Further empirical results	143
B	Appendix to Chapter 3	149
	B.I The bootstrap method	149
	B.2 Orthogonalizing group-specific dummy variables	150
	B.3 Remarks on the German tax and benefit system	151
	B.4 Further empirical results	154
C	Appendix to Chapter 4	157
	List of Figures	159
	List of Tables	161
	References	163
