Technology Shocks

Origins, Managerial Responses,
and Firm Performance

With 34 Figures
and 77 Tables

Physica-Verlag

A Springer-Verlag Company

Contents

1	Frameworks to capture technology shocks: an attempt to integrate current streams of thought	1
1.1	Introduction • • • • >	\
1.1.1	Introducing technology shocks •	1
1.1.2	Characterizing technology shocks at the firm level	3
1.2	Frameworks • •	4
1.2.1	- Innovation of product properties	5
1.2.2	Change in product's value proposition	6
1.2.3	Effects on organizations' competence	7
1.2.4	Differentiation between consumer and investment goods	10
1.2.5	An optimized framework to identify technology shocks	10
1.3	Patterns of technology shocks and the product life cycle	12
1.3.1	Literature focusing on technological change	13
1.3.2	The theory of the product life cycle (PLC)	15
1.3.3	The various phases of the PLC: •	16
1.3.4	Conclusion - do technology shocks cause a PLC-like pattern?	18
1.4	Implications for research • • •	18
2	Success factors for surviving technology shocks	21
2.1	Introduction • •	21
2.2	Main theoretical and methodological streams	21
2.3	'When Darwin strikes': success factors for overcoming technology shocks	25
2.3.1	Company attributes prior to the shock	26
2.3.2	Strategic decisions in reaction to the shock	33
2.3.3	Operational decisions in reaction to the shock	36
2.3.4	Factors with no significant impact on success	40
2.4	Implications for research	41
3	Research gaps and methodology • • •	43
3.1	Introduction •	43
3.2	Need for additional research	43

3.2.1	Additional success factors for future empirical analysis	43
3.2.2	Designs of existing research and their limitations	45
3.2.3	Investigating complex industries	46
3.3	Goals and approach of the research process	48
3.4	The pre-tests	50
3.5	Making the questionnaire available	53
3.6	'Top management still not online'	54
3.7	The necessity of networking	55
3.8	'Going beyond the fruit fly': implications for research	56
4	The machine tool industry and the effects of technological change	59
4.1	Introduction	59
4.2	The machine tool industry after World War II	60
4.3	The availability of information about the industries' recent history	64
4.4	Location of invention, role of national research programs, and no advantage for first movers	66
4.4.1	The first years of a new technology	66
4.4.2	Machine tool manufacturers get involved-what happened to the pioneers	67
4.4.3	National programs for developing a new technology	70
4.5	Patterns and extent of technological change: between shock and evolution	72
4.5.1	Three waves of technological innovation	73
4.5.2	Innovation of product architecture	79
4.5.3	The technology's disruptive effect on companies' capabilities and the loss of competitive advantage	81
4.5.4	Change in the product's value proposition and order of magnitude improvement in value for users	85
4.5.5	Technological change in the machine tool industry and the technology shock matrix	86
4.6	The Japanese success story	89
4.7	External factors	92
4.8	The next wave - trends and future technological changes	93
4.9	Implications for an analysis of technology shocks in the machine tool industry	96
5	Descriptive analysis	99
5.1	Company data and technology shock waves	99
5.1.1	The original set of variables	99

5.1.2	Companies involved and coverage	102
5.1.3	Differentiating success and failure	104
5.1.4	The 'Zombie' phenomenon - or why counting market exits does not always work	105
5.1.5	Defining the shock waves and expanding on the characteristics of the 4 th stage wave pattern	106
5.1.6	Number of firms under observation	109
5.1.7	The importance of the second shock wave	110
5.2	The manager's mind - the perceived importance of success factors for the survival of technology shocks	112
5.2.1	Importance ratings of success factors	112
5.2.2	Ranking by importance of companies' attributes	113
5.2.3	Ranking by importance of strategic decisions	114
5.2.4	Ranking by importance of operational decisions	115
5.2.5	Overall ranking with suggestion of special focus	116
5.3	Secondary findings from the analysis of importance ratings	118
5.3.1	Differences between winners and losers	118
5.3.2	Specific characteristics of the German firms - the largest national group of companies in the sample	119
5.3.3	Differences depending on the size of companies	121
5.4	Conclusion on manager ratings	122
5.5	Managing technology shocks - determinants that distinguish winners from losers	123
5.5.1	Methods to compare 'winners' and 'losers'	123
5.5.2	Strength of technology shock and effects of product types	124
5.5.3	Significant differences in attributes of 'winners' and 'losers'	125
5.5.4	Significant differences in strategic decisions of 'winners' and 'losers'	127
5.5.5	Significant differences in operative decisions of 'winners' and 'losers'	128
5.5.6	'Early' and 'late' losers	129
5.6	Summary of the descriptive analysis	132
6	Multivariate analysis	135
6.1	Introduction of scales	135
6.1.1	Correlations and scales of company attributes	136
6.1.2	Correlations and scales of strategic decisions	138
6.1.3	Correlations and scales of operative decisions	138
6.2	Differences of the scales' means between winners and losers	141
6.3	'Early' and 'late' losers	145

6.4	Determining causal relations through multivariate analysis	146
6.5	Displaying survival	148
6.6	Analyzing the determinants of survival	150
6.6.1	Multivariate analysis of the variables that represent company attributes	151
6.6.2	Multivariate analysis of the variables that represent strategic decisions	155
6.6.3	Multivariate analysis of the variables that represent operational decisions	162
6.7	A combined model of managing technology shocks	163
6.8	Summary of the multivariate results	167
7	Conclusion and outlook	173
	Appendix of chapter 1	177
	Appendix of chapter 3	181
	Appendix of chapter 4	185
	Appendix of chapter 5 •	193
	Appendix of chapter 6	235
	List of figures	243
	List of tables	245
	Abbreviations	249
	References	251
