

Flight Dynamics of a Flexible Aircraft

Von der Gemeinsamen Fakultät für Maschinenbau und Elektrotechnik
der Technischen Universität Carolo-Wilhelmina zu Braunschweig

Zur Erlangung der Würde

eines Doktor-Ingenieurs (Dr.-Ing.)

genehmigte Dissertation

von: Chi-Heng Wu

aus: Pin-Tung, Taiwan

eingereicht am: 20. Oktober 1998

mündliche Prüfung am: 7. Juli 1999

Berichterstatter: Prof. Dr.-Ing. D. Rex
Prof. Dr.-Ing. P. Hamel

Table of Contents

1. Introduction	7
1.1 General Introduction	7
1.2 Background and Previous Work	8
1.3 The Objectives of Present Work	9
2. Basic Theory and Equations of Motion	12
2.1 Basic Theory	12
2.2 Elastic Equations of Motion	13
2.2.1 Wing Segment	13
2.2.2 Wing with Control Surface	15
2.2.3 Tail with Control Surface	20
2.2.4 Validation of the equations of motion (Cantilever Wing)	26
2.3 Unsteady Aerodynamic Model	28
2.3.1 Introduction	28
2.3.2 Incompressible Flow for Arbitrary Motion	28
2.3.3 Compressible Flow for Arbitrary Motion	33
2.3.4 Validation of the Aerodynamic Model	39
2.4 Flight Mechanics Equations of Motion	42
2.4.1 Non-linear 6-DOF Equations of Motion (Flexible Aircraft)	42
2.4.2 Longitudinal Equations of Motion (Small Perturbation Theory)	45
3. Integrated Model of a Flexible Aircraft	49
3.1 Introduction	49
3.2 Open-Loop of a Flexible Aircraft	49
3.3 Closed-Loop of a Flexible Aircraft	52
3.3.1 Requirements of Flying Qualities	52
3.3.2 Linear Quadratic Regulator (LQR)	53
3.3.3 Genetic Algorithms Regulator (GAR)	57
3.3.3.1 Basic Theory	57
3.3.3.2 Implementation	59
4. Application Data Base and Numerical Flow Chart	60
4.1 Introduction	60
4.2 Numerical Data for the Generic Flexible Aircraft	61
4.3 Numerical Method	64
4.3.1 Natural Frequency and Natural Mode Calculation	64
4.3.2 Integration Numerical Methods	65
4.3.3 Eigenvalue Calculation and Simulation in Time Domain	65
4.3.4 Optimal Control Syntheses Calculation	66
4.4 Numerical Flow Charts	67
4.4.1 Numerical Flow Chart Due to Parameters change	67
4.4.2 Numerical Flow Chart Due to SAS Design	68
