

Digital VHF Data Link for Air Traffic Control

Von der Gemeinsamen Fakultät für Maschinenbau und Elektrotechnik
der Technischen Universität Carolo-Wilhelmina zu Braunschweig

zur Erlangung der Würde

eines Doktor-Ingenieurs (Dr.-Ing.)

genehmigte Dissertation

von

Dipl.-Ing. Detlef Schleicher

aus Endeholz

Eingereicht am:
Mündliche Prüfung am:
Berichterstatter:
Mitberichterstatter:

06.02.1999
25.06.1999
Prof. Dr. rer. nat. H. Rohling
Prof. Dr.-Ing. P. Form

2000

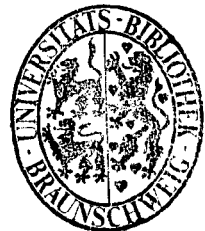

Table of Contents

1. Introduction	1
1.1 Background	1
1.2 Objectives	3
2. Spectrum Sharing.....	7
3. Digital Radio Transmission Technique and Wave Propagation.....	9
3.1. Digital Radio Transmission Technique	9
3.2. Wave Propagation	10
3.2.1. Free-Space Propagation	11
3.2.2. Two-Ray Model	13
3.2.3. ITU Wave Propagation Curves.....	14
4. State of the Art of Aeronautical VHF Telecommunications	17
4.1. Aircraft Communications Addressing and Reporting System	18
4.2. VHF Omnidirectional Range.....	19
4.3. Instrument Landing System.....	19
4.4. Voice Communication.....	19
4.5. The Aeronautical Telecommunications Network.....	19
5. ATN VHF Digital Link	23
5.1. The VDL Modes 1 to 4.....	23
6. VHF Data Link (non ATN).....	25
6.1. Special Category I System	25
6.2. Ground Based Augmentation System	28
7. Aeronautical Data Communications Applications	31
7.1. Automatic Dependent Surveillance.....	31
7.2. Automatic Dependent Surveillance Broadcast.....	31
7.3. Controller Pilot Data Link Communications.....	32
7.4. Traffic Information Services Broadcast	33
7.5. Flight Information Services Broadcast.....	33
7.6. Differential Corrections Broadcast for DGPS.....	34
8. Development of ADS-B Data Formats.....	37
8.1. Definition of Operational Requirements for ADS-B	37
8.2. Proposal for a Set of Initial ADS-B Formats	39

9. Development of a Spectrum Sharing Analysis for a DGPS Service	45
9.1. Development of a Stochastic Propagation Model	47
9.2. Model for the VHF Omnidirectional Range System.....	58
9.2.1. VOR Transmitter Model	58
9.2.2. VOR Receiver Model.....	60
9.2.3. VOR DOC Sectorization Model	62
9.3. Model for the Instrument Landing System.....	63
9.3.1. ILS Transmitter Model	63
9.3.2. ILS Receiver Model	64
9.4. Model for the Differential GPS System	64
9.4.1. DGPS Transmitter Model	65
9.4.2. DGPS Receiver Model.....	66
10. Spectrum Sharing Analysis	67
10.1. Frequency Analysis	68
10.1.1. Interference Mechanisms	70
10.1.2. Identifying the Critical Point	71
10.1.3. Results of Frequency Analysis for Europe	80
10.2. Network Planning.....	81
10.2.1. Planning Procedure	81
10.2.2. Discussion of Network Planning Results.....	83
10.3. Dependency of the Results on Receiver Susceptibility	84
10.4. Limitations Concerning the Application of the Results	88
11. Summary/Conclusions	89
Appendix A.....	91
Digital Modulation Schemes	92
Channel Access Techniques	97
ADS-B Message Coding Examples	102
Appendix B.....	109
List of Tables.....	110
List of Figures	111
Glossary.....	113
Abbreviations	116
References	119
