# **Complexity in New Product Development**

## **Mastering the Dynamics of Engineering Projects**

With a Foreword by  
Prof. Dr. Arnd Huchzermeier and Prof. Dr. Christoph Loch

**A 236277**

---

**Deutscher Universitäts-Verlag**

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
<b>2</b>	<b>Literature Review</b>	<b>8</b>
2.1	Analytic models of design iteration . . . . .	9
2.1.1	Models based on the concurrent engineering paradigm . . . . .	10
2.1.2	Models based on queuing theory . . . . .	13
2.1.3	Models based on the design structure matrix . . . . .	15
2.2	Models based on complexity theory . . . . .	18
2.3	Models from the empirical or descriptive literature . . . . .	29
2.4	Models based on the simulation of agent populations . . . . .	40
2.5	Summary . . . . .	42
<b>3</b>	<b>Model Description</b>	<b>43</b>
3.1	Structure of the NPD process . . . . .	44
3.2	Component performance and interdependence . . . . .	45
3.2.1	Influence of the individual decision maker on the component . . . . .	46
3.2.2	Influence of other decision makers on the component . . . . .	48
3.2.2.1	Influence on the optimal component decision . . . . .	48
3.2.2.2	Influence on the component performance . . . . .	49

3.2.2.2.1	Piecewise linear formulation of bounds . . . . .	50
3.2.2.2.2	Boundary conditions as error function . . . . .	50
3.2.2.3	Interaction of influences . . . . .	51
3.2.3	Performance of the individual decision maker . . . . .	51
3.2.4	Total performance of the NPD network . . . . .	52
3.3	Role of time . . . . .	53
3.3.1	Decision making and time . . . . .	53
3.3.2	Communication and time . . . . .	55
3.4	Decision making and coordination . . . . .	56
3.4.1	Decisions of the uncooperative decision maker . . . . .	56
3.4.2	Decisions of the cooperative decision maker . . . . .	58
3.4.2.1	Optimization in the piecewise linear case . . . . .	59
3.4.2.2	Optimization in the error function case . . . . .	62
3.5	Model discussion . . . . .	63
3.5.1	Model limitations . . . . .	64
3.5.2	Model characteristics in view of the NK model . . . . .	66
<b>4</b>	<b>Analytic Results</b>	<b>67</b>
4.1	Closed form analysis for the base case . . . . .	68
4.2	Numerical example . . . . .	73
4.3	Implications for the base case . . . . .	73
<b>5</b>	<b>Simulation Results</b>	<b>76</b>
5.1	Definition of simulation technicalities . . . . .	76
5.2	Simulation results . . . . .	81
5.2.1	Base case . . . . .	82

5.2.2	Cooperation among agents . . . . .	87
5.2.2.1	Cooperation among agents assuming piecewise linear bound- ary conditions . . . . .	88
5.2.2.2	Cooperation among agents assuming erf-boundary conditions	92
5.2.3	Instantaneous broadcast of decisions among agents . . . . .	94
5.2.4	Communication of preliminary information . . . . .	96
5.2.5	Networks not fully connected . . . . .	99
5.2.6	Equivoque . . . . .	104
5.2.7	Robustness of model and results . . . . .	105
<b>6</b>	<b>Discussion and Conclusion</b>	<b>110</b>
	<b>Bibliography</b>	<b>115</b>
<b>A</b>	<b>Properties of the Error Function</b>	<b>131</b>
<b>B</b>	<b>Simulation Data</b>	<b>135</b>
B.1	Data for the base series of simulations (25,000 time units) . . . . .	136
B.2	Data for the 10,000 time units verification run . . . . .	146
B.3	Data for the 40,000 time units verification run . . . . .	156
B.4	Data for the $b_1$ verification run . . . . .	166
<b>C</b>	<b>Program Listing</b>	<b>177</b>
C.1	Base case . . . . .	178
C.2	Adaptations for instantaneous broadcast . . . . .	206
C.3	Adaptations for the simulation of cooperation . . . . .	209
C.4	Adaptations for the error function case . . . . .	222
C.5	Adaptations for the depleted case . . . . .	235
