### **Essays on Network Industries: Privatization, Regulation, and Productivity Measurement**

by

Andreas Kuhlmann

## Table of Contents

<b>1</b>	<b>Introduction .....</b>	<b>1</b>
1.1	Common characteristics of network industries .....	1
1.2	Privatization.....	2
1.3	Regulation.....	3
1.4	Main focus of the dissertation .....	5
<b>2</b>	<b>Privatization Incentives – A Wage Bargaining Approach.....</b>	<b>7</b>
2.1	Introduction .....	7
2.2	The Model .....	9
2.3	Wages and Investments .....	10
2.3.1	Supply, Factor Demand and Wage Bargaining .....	11
2.3.2	Investments .....	13
2.4	A Numerical Example .....	15
2.5	Conclusions .....	18
<b>3</b>	<b>The German Electricity Sector – Finally on the Move? .....</b>	<b>20</b>
3.1	Introduction .....	20
3.2	Particularities of the electricity sector .....	20
3.2.1	Natural monopoly .....	20
3.2.2	Vertical Separation .....	22
3.2.3	Market clearance and market power in generation.....	24
3.2.4	Energy as an essential input for every economy .....	24
3.3	Lessons from US electricity sector reforms .....	25
3.3.1	The California crisis .....	25
3.3.2	General features and institutions of the US electricity market .....	27
3.4	The German electricity sector.....	28
3.4.1	The Energy Law of 1998 .....	28
3.4.2	The new Energy Law of 2005 .....	30
3.4.3	Critique of the German approach .....	32
3.5	Conclusions .....	36

<b>4 German Productivity – A Reassessment via the new Ifo Productivity Database .....</b>	<b>38</b>
4.1 Introduction .....	38
4.2 Growth Accounting Framework.....	40
4.2.1 The Gross Output and the Value Added Concept .....	43
4.3 Data .....	44
4.3.1 Capital Stocks.....	44
4.3.2 Capital Services.....	45
4.3.3 Output, intermediate and labor input, demography.....	46
4.4 Assessment of the historical data .....	47
4.4.1 Sources of Growth in GDP.....	47
4.4.2 Sources of Growth in Average Labor Productivity.....	49
4.4.3 Industry contributions to total TFP-growth and structural change	52
4.5 Projecting productivity growth.....	54
4.5.1 Common Assumptions .....	55
4.5.2 Alternative Assumptions .....	55
4.6 Conclusions .....	57
<b>5 What is the X-Factor in the German Electricity Industry? .....</b>	<b>59</b>
5.1 Introduction .....	59
5.2 Framework .....	60
5.2.1 The RPI-X Regulation.....	60
5.2.2 Productivity Analysis .....	62
5.3 Data .....	65
5.3.1 Capital Stocks.....	65
5.3.2 Capital Services.....	66
5.3.3 Output and Labor.....	67
5.4 Productivity Analysis.....	67
5.4.1 X- Factor determination .....	69
5.4.2 Comparison to international analyses.....	69
5.4.3 Robustness check.....	71
5.5 Modification of the estimated X-factor.....	72
5.5.1 Accounting for a limited span of regulatory control .....	72
5.5.2 Accounting for structural changes in the regulated industry.....	73

5.5.3	Accounting for imperfect competition in the economy .....	74
5.5.4	Accounting for endogeneity in the economy-wide inflation rate ..	75
5.6	Conclusions .....	76
<b>6</b>	<b>Concluding Remarks .....</b>	<b>78</b>
	<b>References .....</b>	<b>80</b>
	<b>Appendix .....</b>	<b>88</b>
	The Ifo Productivity Database .....	88
	Descriptive Statistics .....	88
	Data Sources concerning Labor and Capital .....	90
	The Ifo Investorenrechnung Database .....	92
	Domar TFP-Aggregation .....	96
