

Katrin Susanne Mühlfeld

Strategic Shifts between Business Types

A transaction cost theory-based approach
supported by dyad simulation

With a foreword by Prof. Dr. Klaus Backhaus

Deutscher Universitäts-Verlag

Table of contents

List of figures and tables	XV
List of abbreviations	XVII
1 Strategic shifts between business types as essential elements of the market process	1
1.1 Recognizing and seizing opportunities for shifts between business types as a touch-stone of firm strategy	1
1.2 Research purpose and organization of the analysis	6
2 Strategic decisions for business-type specific marketing in industrial goods markets	11
2.1 Static perspective: structuring business transactions	11
2.1.1 Foundations of systematic approaches to industrial marketing	11
2.1.1.1 On the usefulness of systematizing business transactions	11
2.1.1.2 Methodological aspects: emphasizing the role of typological theories in structuring	12
2.1.1.3 Overview of different approaches to structuring industrial marketing transactions	15
2.1.2 Derivation of a market sides-balancing typology on the basis of New Institutional Economics reasoning	22
2.1.2.1 A basic outline of the foundations of New Institutional Economics as relevant to the marketing perspective	22
2.1.2.2 Selecting transaction cost theory as appropriate framework	25
2.1.2.3 Essential elements of transaction cost theory	32
2.1.2.3.1 Focal concept.....	32
2.1.2.3.2 Behavioral assumptions.....	33
2.1.2.3.3 Transaction determinants	35
2.1.2.4 Transfer to industrial marketing: the transaction cost analysis way of structuring	44
2.1.2.5 Derivation of a modified structure based on a selected typology: the idea of “business types constellations”	52
2.1.2.6 Constitutive elements of a business types constellation	71
2.1.2.7 Type-specific marketing problems and management focus.....	80

2.1.2.8	Interpretation of the business types concept as a typological theory	85
2.2	Defining the notion of strategy	87
2.2.1	A framework for organizing the “strategic variety”	87
2.2.1.1	Decision theoretic orientation as organizing criterion	88
2.2.1.2	Analytical focus as organizing criterion	90
2.2.1.3	Subject area and subject matter as organizing criteria.....	91
2.2.1.3.1	Subject area I: the economic domain	91
2.2.1.3.2	Subject area II: the domain of (industrial marketing) management.....	96
2.2.2	Proposing a definition of strategy for the business types concept	98
3	Dynamic perspective I: fundamental considerations on strategic shifts between business types constellations	100
3.1	Motivations for a dynamic view on the business types concept.....	100
3.1.1	Arguments from a theoretical perspective	100
3.1.2	Arguments from a business practice perspective	102
3.2	Strategic shifts in the business types framework	105
3.2.1	Changes in strategy - a sketch from the literature.....	105
3.2.2	Definition of strategic changes as shifts between business types constellations	114
3.2.3	Foundations of shifts between business types: asset specificity as a choice variable	117
3.2.3.1	Proposition of a framework with asset specificity as choice variable at its center.....	117
3.2.3.2	Discussion of individual impacts and antecedents	123
3.2.3.2.1	Productivity gains.....	123
3.2.3.2.1.1	Seller-side: technological feasibility	124
3.2.3.2.1.2	Buyer side: receptivity for specificity.....	125
3.2.3.2.1.3	Path dependencies	128
3.2.3.2.2	Perceived danger of exploitation.....	130
3.2.3.2.2.1	Uncertainty	131
3.2.3.2.2.2	Distinct modeling of buyer and seller perception	140
3.2.3.3	Implications from asset specificity as a choice variable: examples from business practice	141

3.2.3.3.1	Consequence 1: the same functionality is supplied in various business types constellations	141
3.2.3.3.2	Consequence 2: the same functionality is supplied in various business types constellations by various firms.....	143
3.3	Motivations of seller-initiated redesigns of business types constellations	145
3.3.1	Fundamental (entrepreneurial) objectives in transactions and the subgoals of creating, claiming, and protecting value	145
3.3.2	The impact of initial constellation on subgoal weightings and resulting strategic imperatives	151
3.3.3	Impulses as necessary conditions for shifts between business types constellations and the role of subjective increases in knowledge	158
3.3.3.1	The role of exogenous shocks in impulse generation	158
3.3.3.2	The role of subjective knowledge increases and the ability to seize opportunities in impulse translation	160
3.3.4	Potential sources of impulses and resulting strategic imperatives	167
3.3.4.1	Deriving a systematization of sources	167
3.3.4.2	Discussion of individual sources	169
3.3.4.2.1	Market partner-related impulses.....	169
3.3.4.2.1.1	Intra-company impulses	169
3.3.4.2.1.2	Buyers.....	171
3.3.4.2.1.3	Suppliers.....	174
3.3.4.2.1.4	Competitors	174
3.3.4.2.1.5	Complementors	176
3.3.4.2.2	Environmental impulses.....	177
4	Dynamic perspective II: considerations on sufficient conditions for shifts between business types constellations	180
4.1	Legal restrictions.....	181
4.2	General considerations on asserting shifts between business types constellations	184
4.3	Derivation of an analytical framework for the examination of shifts between business types constellations	187
4.3.1	General considerations and conceptual roots of the proposed model	187
4.3.1.1	The <i>Riordan/Williamson</i> (1985) optimization model.....	188
4.3.1.2	The optimizing approach by <i>Aufderheide</i> (1993, 2000)	192
4.3.1.3	The approach by <i>Plinke</i> (1989, 1997): customer relationships as investments	195

4.3.2	Foundations of a simple model for evaluating shifts between business types constellations.....	198
4.3.2.1	Derivation of the buyer's general utility function U_N	199
4.3.2.2	Derivation of the seller's general profit function π_A	205
4.4	Shifts between business types constellations in business practice: a case study-based illustration of the model	210
4.4.1	Applicability of the case study method for shift analysis	210
4.4.2	A case from the chemical industry	212
4.4.2.1	Background and impulse	212
4.4.2.2	Application of the analytical model in a numerical example	217
4.4.2.2.1	Traditional constellation: bilateral product business	218
4.4.2.2.2	New constellation: bilateral project business with tendencies towards relational business.....	219
4.4.2.2.3	Comparison of the strategic options.....	223
4.5	Extending the concept to capture the value of flexibility and consequences of path dependencies in an interactive context	225
4.5.1	The necessity of incorporating issues of flexibility and path dependency.....	225
4.5.2	A simple interactive model of shifts between business types	226
4.5.2.1	Objectives of the model	226
4.5.2.2	Model design and underlying assumptions	228
4.5.2.3	Proposing a simulative solution method	237
4.5.2.4	Selected results from the model	242
4.5.2.4.1	The joint impact of the probability for an unfavorable stage 2 scenario and the R&D investment in the new constellation	243
4.5.2.4.2	The joint impact of R&D investment and improvement of the buyer's best available alternative in the course of the game.....	245
4.5.2.4.3	The joint impact of ex ante and ex post seller trans- action costs incurred in the new constellation.....	248
4.5.2.4.4	Some particularities of the impact of the probability for an unfavorable stage 2 scenario	251
4.5.3	Some supplementary considerations on value division	253
4.5.4	Concluding remarks on insights from and limitations of the extended model	256

5	Conclusion	259
5.1	Summary	259
5.2	Limitations and directions for further research.....	263
