

# Mammals in the seas

Volume III

General Papers  
and Large Cetaceans

Selected papers of the  
Scientific Consultation on the Conservation and Management  
of Marine Mammals and their Environment

FAO ADVISORY COMMITTEE ON  
MARINE RESOURCES RESEARCH  
WORKING PARTY ON MARINE MAMMALS

with the cooperation of the  
UNITED NATIONS ENVIRONMENT PROGRAMME

<b>EDITOR'S NOTE</b> . . . . .	<i>Page</i> <b>IX</b>
--------------------------------	--------------------------

**GENERAL PAPERS**

Dolphins do; dugongs don't, (J.W. Meeker) . . . . .	3
Economic aspects of renewable resource exploitation as applied to marine mammals, (C.W. Clark) . . . . .	7
Maximum sustainable yield and its application to whaling, (S.J. Holt) . . . . .	21
Some economic aspects of marine mammal management policies: the future and the discount rate, (C. Price) . . . . .	57
Some aspects of evaluating low-consumptive uses of marine mammal stocks, (P. Copes) . . . . .	67
Aspects of determining the stock level of maximum sustainable yield, (S.J. Holt) . . . . .	73
The optimization of management strategy for marine mammals, (K.R. Allen) . . . . .	77
A note on the strategy of the management of marine mammals, (J.A. Gulland) . . . . .	93
Objectives for the management and conservation of marine mammals, (J. Gordon Clark) . . . . .	103
Some aspects of cetacean neuroanatomy, (P. Fortom-Gouin) . . . . .	117
Cetacean behaviour, learning and communication, (M. Overland) . . . . .	123
Biochemical genetic studies, their value and limitations in stock identification and discrimination of pelagic mammal species, (G.D. Sharp) . . . . .	131
A census of captive marine mammals in North America, (L.H. Cornell and E.D. Asper) . . . . .	137
The transition from fisheries to marine farming as the primary long-term objective of marine mammal management, (A.V. Yablokov) . . . . .	151

**LARGE CETACEANS**

Man's exploitation of the western Arctic bowhead, (J. Bockstoe) . . . . .	163
The humpback whale: present knowledge and future trends in research with special reference to the western North Atlantic, (H.E. Winn and G.P. Scott) . . . . .	171
Status of the eastern Pacific (California) stock of the gray whale, (D.W. Rice) . . . . .	181

	<i>Page.</i>
New techniques for assessing populations of right whales without killing them, (H. Whitehead and R. Payne) . . . . .	189
Review of pygmy blue whale stock in the Antarctic, (T. Ichihara)	211
A note on the abundance of Antarctic blue whales, (J.A. Gulland)	219
Population assessments of Antarctic fin whales, (R. Gambell) . . .	229
A review of population assessments of southern minke whales, (R. Gambell) . . . . .	249
Investigations into the population morphology of sperm whales, <i>Physeter macrocephalus</i> L. 1758, of the Pacific Ocean, (A.A. Berzin and G.M. Veinger) . . . . .	259
Review of Balaenopterids in the North Atlantic Ocean, (C.J. Rorvik and A. Jonsgard) . . . . .	269
Ecologie des cétacés de la Méditerranée occidentale, (D. Viale) ..	287
Evidence of whaling in the North Sea and English Channel during the Middle Ages, (W.M.A. De Smet) . . . . .	301
Actividad ballenera en el Pacífico sur-oriental, (L. Arriaga) . . . . .	311
Historical records of American sperm whaling, (R.C. Kugler) . . .	321
Sperm whale size determination: outlines of an acoustic approach, (B. Mehl, E. Larsen and M. Amundin) . . . . .	327
The adequacy of the scientific basis for the management of sperm whales, (T.D. Smith) . . . . .	333
Leslie matrix models and whale populations, (M.B. Usher) . . . . .	345
Objectives of management, with particular reference to whales, (S.J. Holt) . . . . .	349
Antarctic arguments and options, (D.J. Tranter) . . . . .	359
On the joint exploitation of krill and whales, (J.W. Horwood) ..	363
The whaling museum as a data source for whale population studies: problems and responsibilities, (K.R. Martin) . . . . .	369
Energy and outputs in an Australian coastal whaling operation, (K.R. Allen) . . . . .	375
Growth and energy budgets of large baleen whales from the Southern Hemisphere, (C. Lockyer) . . . . .	379
Estimates of growth and energy budget for the sperm whale, <i>Physeter catodon</i> , (C. Lockyer) . . . . .	489
